1.0 EXECUTIVE SUMMARY

CBRE has performed this Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of ASTM Phase I Environmental Site Assessment Practice E1527-13 of 7000 E Mayo Boulevard, Phoenix, Arizona (Subject Property). The ASTM Standard was designed to meet the requirements of the United States Environmental Protection Agency's (USEPA's) All Appropriate Inquiries (AAI) into the previous ownership and uses of the property consistent with good commercial and customary practice as defined at 42 U.S.C. §9601(35)(B). The purpose of this Phase I ESA was to assess existing site conditions and render an opinion regarding the presence of recognized environmental conditions in connection with the Subject Property in accordance with USEPA AAI requirements. Any exceptions to, or deletions from, this practice are described in Section 11.0 of this report.

The Subject Property, which is situated in a suburban area characterized by mixed-use development, consists of a 74.3-acre tract of land, improved with a 17 building retail center that was constructed on-site in 2003. At the time of CBRE's site reconnaissance, the Subject Property was anchored by a Harkins Theater, Bowlero bowling alley, C2 Tactical gun range, Bed Bath & Beyond, Eos Fitness, PGA Tour Superstore, and Dick's Sporting Goods and approximately 41 smaller tenants. The following is a breakdown of the types of tenants comprising the property:

- 20 dining-related businesses
- 4 entertainment-related businesses
- 5 retail businesses
- 19 service-related businesses

No dry cleaners or automotive-related businesses are currently or are known to have previously been present on the property. No tenants, occupants, or operations were identified on the Subject Property that are considered an environmental concern to the Subject Property.

Prior to the construction of the current on-site improvements in 2003, the Subject Property was native desert land.

RECOGNIZED ENVIRONMENTAL CONDITIONS

The term Recognized Environmental Conditions (RECs) as defined by ASTM Standard E 1527-13 is "...the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment."

This assessment has revealed no evidence of RECs in connection with the Subject Property.

CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS

A Controlled Recognized Environmental Condition (CREC) as defined by ASTM Standard E 1527-13 refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

This assessment has revealed no evidence of CRECs in connection with the Subject Property.

HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS

A historical recognized environmental condition (HREC) as defined by ASTM refers to a REC resulting from a past release of any hazardous substances, or petroleum products that has occurred in connection with the Subject Property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the Subject Property to any required controls (for example, Subject Property use restrictions, activity and use limitations, institutional controls, or engineering controls).

This assessment has revealed no evidence of HRECs in connection with the Subject Property.

BUSINESS ENVIRONMENTAL RISKS

ASTM E 1527-13 outlines a non-exhaustive list of "non-scope considerations" that includes but is not limited to asbestos-containing building materials, indoor air quality, lead-based paint, lead in drinking water, mold, and radon. The ASTM Standard was not designed to address Business Environmental Risks (BERs), which are risks that are not required to meet the AAI requirements but may have a material environmental or environmentally-driven impact associated with the current or planned land use. Non-scope items considered in this Phase I ESA are discussed in Section 8.0.

This assessment has revealed no BERs in connection with the Subject Property.

OTHER ENVIRONMENTAL CONSIDERATIONS

Other Environmental Considerations (OECs) are items that do not qualify as RECs, HREC, CRECs, or non-scope considerations. These may include de minimis conditions or items that are worthy-of-note.

This assessment has revealed the following OEC in connection with the Subject Property:

- At least one drywell used for the disposal of stormwater runoff was observed on the property. The use of drywells for this purpose in Arizona is common, and the presence of drywells is not considered an environmental concern. However, the onsite drywell(s)

do not appear to be registered with the Arizona Department of Environmental Quality (ADEQ). As such, the proper registration of the onsite drywell(s) in accordance with ADEQ requirements may be prudent.

RECOMMENDATIONS

Based on the findings of this assessment, no further investigation is recommended at this time.

2.0 SCOPE OF WORK

2.1 General

CBRE was retained by 101 & Scottsdale LLC and the Arizona State Land Department (“Client” or “User”) to prepare a Phase I ESA, in conformance with ASTM International's Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process E 1527-13 and Client's Scope of Work on the Subject Property in accordance with our Agreement dated December 5, 2022, and the Conditions and Limitations described herein.

2.2 Purpose

The purpose of this report is to identify potential RECs in connection with the Subject Property, using the methodology recommended by ASTM International for a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous Subject Property owner, or bona fide prospective purchaser defenses to CERCLA liability and/or to help understand potential environmental conditions that could materially impact the operation of the business associated with the Subject Property. Specifically, this methodology is referred to as *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process Designation: E 1527-13*.

2.3 Procedure

This assessment consisted of reviewing readily ascertainable information and environmental data relating to the Subject Property; interviewing readily available persons knowledgeable about the Subject Property; reviewing readily available maps, aerial photographs and records maintained by federal, state, and local regulatory agencies; and conducting a visit to the Subject Property.

The Client is advised that federal, state, and local laws may impose environmental assessment obligations beyond the scope of this practice.

The specific scope of this assignment included the following:

Subject Property Reconnaissance

A reconnaissance of the Subject Property was performed to characterize conditions and assess the likelihood of identifying RECs in connection with the Subject Property. This includes consideration of observed adjoining and surrounding property uses, natural surface features, surrounding roadways, and other adjoining and nearby improvements. To the extent that they can be visually and/or physically observed, current and past uses of the Subject Property, adjoining and surrounding area, and associated known or potential environmental concerns and RECs were documented. Photographs taken as part of the Subject Property reconnaissance are provided in the [Photographs](#) Appendix of this report.

Interviews

CBRE made a reasonable effort to interview past and present owners and occupants, as well as government representatives to obtain information on present and previous on-site activities potentially resulting in environmental degradation of the Subject Property or adjoining properties. A reasonable effort was also made to interview the User or their representative to assist the User and the environmental professional in gathering information from the User that may be material to identifying RECs. In accordance with ASTM E1527-13, questions and/or questionnaires have been established specific to 1) key site contact; 2) past and present owners and occupants (if not the key site contact); and 3) the User or representative(s). These questionnaires are in the [User and Pre-Survey Questionnaires](#) Appendix of this report.

Previous Reports and Documentation

If provided, the Phase I ESA process included the review of information such as previously prepared appraisals, building plans and specifications, and environmental reports from the User. Copies of pertinent documents provided to and reviewed by CBRE are included in the [Correspondence and Supporting Documents](#) Appendix of this report.

Historical Documents

CBRE reviewed readily available historical documents to identify previous activities on and in the vicinity of the Subject Property. These include topographic maps, Sanborn Fire Insurance Maps, aerial photographs, and city directories, if available, as described within Section [4.0 HISTORICAL USE](#). Copies of these documents are included in the [Maps and/or Historical Aerial Photographs](#) Appendix of this report.

Regulatory Records

The Phase I ESA process included reviewing readily available environmental databases maintained by federal, state, and local agencies within the approximate minimum search distances as described within Section [5.0 REGULATORY RECORDS](#) in this report. A copy of the environmental Regulatory Database Report (Regulatory Database), provided by EDR can be referenced in the [Regulatory Database Report](#) Appendix of this report.

Regulatory Agency File Review

CBRE reviewed readily available environmental databases maintained as files, records, or reports by federal, state, and local agencies, as applicable, to assess environmental conditions at the Subject Property, and as appropriate the adjoining or surrounding properties, as described within Section 5.2 [Regulatory Agency File and Records Review](#). A copy of the records can be referenced in the [Supplementary Documentation](#) Appendix of the report.

Vapor Encroachment Screening

CBRE conducted a “Tier I” (non-intrusive) Vapor Encroachment Screening (VES) on the Subject Property in accordance with the methodology set forth in ASTM E 2600-15 “*Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*” as described in Section [9.0 VAPOR ENCROACHMENT CONDITIONS \(VECs\)](#). CBRE utilized applicable industry standard methodology for conducting the VES.

Non-ASTM Scope Considerations

Environmental issues or conditions that are not included in CERCLA’s definition of hazardous substances (42 U.S.C. §9601(14)), or that do not otherwise present potential CERCLA liability at a property, that are outside the scope of this practice and that have been considered, are documented in Section [8.0 NON-ASTM SCOPE CONSIDERATIONS](#). This may also include standards or protocols for the assessment of potential hazards and conditions associated with non-scope conditions developed by governmental entities, professional organizations, private entities, or the User of this Phase I ESA.

Asbestos

CBRE conducted a visual survey of readily accessible common areas to identify the presence of the most obvious and common types of suspect asbestos-containing materials (ACM). The basis for “suspect” determination is taken from the materials listed in Appendix G of the USEPA publication *Managing Asbestos in Place* (also known as the Green Book). Building materials listed within Appendix G of the Green Book are considered to be suspect ACMs at the Subject Property. The suspect ACM screening is not intended for formal identification or management of asbestos in building materials that might be disturbed by demolition, abatement, renovation, or repair work.

Microbial Growth

In the course of conducting observations for the presence of microbial growth, only representative accessible portions of the Subject Property improvements were inspected. In those observed portions, CBRE made representative observations of areas that are readily accessible, easily visible, and safe with respect to the field observer. For this reason, CBRE does not warrant that findings represent conditions in unobserved areas. The limited observations for mold are not to be construed as an in-depth microbial survey.

Lead Based Paint

CBRE evaluated the age of the Subject Property to determine whether it is predisposed to contain lead-based paint (LBP), and if the presence of LBP is likely, made observations of the condition of painted surface. In the course of conducting observations for the presence of LBP, only representative accessible portions of the Subject Property improvements were inspected. In those observed portions, such observations were limited to representative areas that were readily

accessible, easily visible, and safe with respect to the field observer. For this reason, CBRE does not warrant that findings represent conditions in unobserved areas. The limited observations for lead-based paint are not to be construed as an in-depth LBP survey.

Sample Collection and Analysis

Testing, if any, of building materials, was designed solely to meet the requirements of the client's scope of work, not to meet any local, state or federal regulations and shall not be utilized as such, unless indicated herein.

Wetlands

A wetland delineation survey was beyond the scope of this assessment. CBRE reviewed the applicable United States Fish and Wildlife Service National Wetlands Inventory (NWI) map and USGS quadrangle map. Observations were made for general wetland features.

Radon

CBRE reviewed published radon occurrence maps to determine whether the site is located in an area with a propensity for elevated radon concentrations.

2.4 Data Gaps

According to § 3.2.21 of ASTM Standard E 1527-13, a data gap is a lack of or inability to obtain information required by the ASTM Standard despite good faith efforts to gather same. Data gaps may result from incompleteness in any of the activities required by the ASTM Standard.

The following data gaps occurred in connection with this report:

Data Gap Detail	Significance of Data Gap
Site history not conducted in 5-year intervals (See § 4)	Low - not likely to alter the conclusions of this Report
User Questionnaire not returned to CBRE	Low - not likely to alter the conclusions of this Report
No response to FOIA (See § 5.2)	Low - not likely to alter the conclusions of this Report
Unable to locate or interview former site owner or operator	Low - not likely to alter the conclusions of this Report

None of the data gaps affected the ability of the Environmental Professionals involved in this assessment to identify RECs in connection with the Subject Property, as defined by ASTM.

3.3 Current Subject Property Use and Operations

The Subject Property is improved with a 17-building, 405,465 SFR retail center referred to as Scottsdale 101 that was constructed in 2003. The Subject Property is currently anchored by a Harkins Theater, Bowlero bowling alley, C2 Tactical gun range, Bed Bath & Beyond, Eos Fitness, PGA Tour Superstore, and Dick's Sporting Goods and includes approximately 41 smaller tenants. A complete tenant list is provided in the appendix. The following is a breakdown of the types of tenants comprising the property:

- 20 dining-related businesses
- 4 entertainment related businesses
- 5 retail businesses
- 19 service-related businesses

No dry cleaners or automotive-related businesses are present on the property. No tenants, occupants, or operations were identified on the Subject Property that are considered an environmental concern to the Subject Property. However, the following tenants warrant mention:

Fix 24 Chiropractic

The chiropractic office utilizes digital x-ray equipment; no photo developing solutions are used and no silver containing wastes are generated.

C2 Tactical Gun Range

C2 Tactical Gun Range operates an indoor gun range within the tenant space. The indoor gun range has a concrete paved floor and no areas of exposed dirt or subsurface were observed. The lead containing bullet fragments within the range are mined on a regular basis by Firing Range Services (FRS). FRS' services include maintenance, cleaning & treatment of lead contaminated surfaces, reduction in airborne lead (booths, walls, floors, equipment, backstops, ventilation

systems, etc.), lead/brass reclamation, and recycling. Based on the fact that the indoor shooting range is equipped with a paved surface and mining is conducted on a regular basis, this tenant is not suspected to have impacted the Subject Property and does not represent an REC.

Verizon and AT&T

CBRE observed two wireless telecommunication facilities located along the northern border of the site. These facilities are operated by AT&T and Verizon Wireless. The equipment consists of mounted panel antennas within the two pylon signs in addition to three equipment cabinets located adjacent to the pylon signs. An emergency generator is associated with the Verizon Wireless equipment cabinet enclosure and operations. This equipment is not suspected to be of environmental concern.

Bed Bath & Beyond

CBRE identified several universal waste non-aerosol, ignitable, corrosive acidic, corrosive basic, reactive, and toxic hazardous waste storage containers in the stock room. No floor drains or sumps were observed in the vicinity of the stored hazardous waste and housekeeping was satisfactory. The waste containers were generally in good condition, capped and did not exhibit evidence of significant spillage or leakage. The waste containers are stored on impervious surfaces. The waste manifests observed appeared to be in order. The wastes are removed by on an as needed basis. No concerns are associated with this waste generation.

Restaurant Tenants

Restaurant tenants utilize metal and plastic containers for the storage of kitchen grease. These containers are maintained by various third-party contractors, and are cleaned out on an as needed basis. In addition, below grade grease interceptors were observed on-site. The interceptors collect fats, oils and grease from sinks and wash water associated with the restaurant kitchens prior to discharge to the sanitary sewer. According to the site contact, the interceptors are cleaned out on a regular basis by various contracted disposal companies. The presence of this equipment is not expected to be of a significant environmental concern to the Subject Property.

3.4 Adjoining and Surrounding Land Use

The Subject Property is located in a suburban setting characterized by mixed-use development as tabulated below:

Direction	Adjoining Properties	Surrounding Properties
North	Loop 101 freeway with vacant land beyond.	Additional areas of vacant land
East	Scottsdale Road with vacant land beyond.	Additional areas of vacant land
South	Office buildings (6811 E Mayo, 18500 N Allied Way) and retail (7077-7111 E Mayo)	Office buildings and automotive dealerships

Direction	Adjoining Properties	Surrounding Properties
West	Native desert land	Farther west are areas of vacant land and multi-family development.

No tenants, occupants, or operations were identified on the adjoining or surrounding properties that are considered an environmental concern to the Subject Property.

3.5 Physical Setting

CBRE evaluated the general physical setting of the Subject Property and vicinity using information regarding the topography, surface water, geology, and hydrology to evaluate the likelihood of hazardous substances or petroleum products originating from off-site sources, from within the Subject Property, or from the Subject Property to off-site receptors. The information was obtained from readily-accessible sources. Actual conditions may vary from general conditions in the area.

Physical Attribute	Description
Topography	The Subject Property is essentially flat and at the same approximate topographic gradient as the surrounding properties. The topography of the area is best described as flat. According to the United States Geological Survey (USGS) Currys Corner, <i>Arizona</i> 7.5 Minute Series topographic map, the Subject Property's topographic elevation is approximately 1592' above mean sea level.
Surface Waters	No surface water bodies were observed on or bordering the Subject Property. There are no open surface water bodies within one mile of the Subject Property.
Wetlands	CBRE reviewed the applicable United States Fish and Wildlife Service National Wetlands Inventory (NWI) map and USGS quadrangle map. Based on this information, no wetland resources were identified on or adjoining the Subject Property.
Geology	There are no predominant geological surface features such as rock outcroppings on the Subject Property. Phoenix, Arizona is located in the East Salt River Valley sub-basin of the Phoenix Active Management Area of the Basin and Range physiographic province. This basin is generally characterized as an alluvial filled basin, bounded by elongated mountain ranges. The basin can extend to depth of greater than 1,500 feet and include fine to coarse-grained sediments eroded from surrounding mountains. There are three stratigraphic units that may comprise the alluvial basin in the vicinity of the site in Phoenix. In descending order the three layers are the Upper Alluvial Unit, the Middle Fine-Grained Alluvial Unit, and the Lower Conglomerate Alluvial Unit.
Soils	According to the USDA NRCS Web Soil Survey, soils are expected to be of the Gilman loams series and the momoli gravelly sandy loam series with 1 to 5 percent slopes. These soils are derived from mixed alluvium. Permeability of these soils is classified as well drained.
Groundwater	According to the Arizona Department of Water Resources, groundwater flow is southwesterly and occurs at a depth of over 450 feet below ground surface.

4.0 HISTORICAL USE

Subject Property Summary Findings

Prior to the construction of the current on-site improvements in 2003, the Subject Property was undeveloped desert land. Since the construction of the current improvements, the Subject Property has been occupied by various retail, commercial, and restaurant tenants.

No environmentally sensitive historical uses were identified in association with the Subject Property.

Adjoining and Surrounding Property Summary Findings

The historical uses of the adjoining and surrounding properties consisted of undeveloped desert land prior to the early 1970s, when areas to the south were developed for agricultural use. By the mid-2000s, the areas to the south had been redeveloped with the current commercial improvements. Additional commercial development appeared to the southwest and southeast in the early 2010s, and the current surrounding properties were developed by the late 2010s.

No environmentally sensitive historical uses of the adjoining or surrounding properties were identified.

A copy of the Subject Property's Chain-of-Title has not been provided to CBRE for review.

4.6 Previous Reports, Plans, Surveys, and Other Historical Documentation

CBRE was provided the following previous environmental assessment of the Subject Property, which is included in the appendices. The information obtained was not verified for accuracy by CBRE and a critique of the report was beyond the scope of this assessment. The following is a summary of the document provided for review:

Report Name / Address	Report Date	Preparer	Client
Phase I Environmental Assessment of Scottsdale 101, 7000 East Mayo Boulevard, Phoenix, Arizona 85054	January 10, 2020	CBRE	JP Morgan Chase Bank

According to the report, the Subject Property was undeveloped land prior to the construction of the current on-site developments. The report identified similar findings to this CBRE report. The report did not identify any RECs, CRECs, HRECs, nor BERs. A review of this documentation did not identify environmental concerns to the Subject Property.

5.0 REGULATORY RECORDS

Summary Findings

Results of the regulatory database and regulatory records review did not identify environmental concerns to the Subject Property.

5.1 Regulatory Database

The Regulatory Database Report documents the listing of sites identified on federal, state, and local (when applicable) standard source environmental databases within the approximate minimum search distance (AMSD) specified by ASTM Standard Practice for Environmental Site Assessments E 1527-13. A copy of the Regulatory Database Report is in the [Appendices](#) and is used to identify RECs in connection with the Subject Property. The listings serve to identify the known indications of the storage, use, generation, disposal, or release of hazardous substance at the Subject Property and the potential for contaminants to migrate onto the Subject Property from off-site sources in groundwater, or soil in the form of liquids or vapor.

The following table lists the number of sites as categorized by the regulatory database within the prescribed AMSD.

5.1.1 Subject Property Listings and Findings

Home Depot, a former tenant of the Subject Property, was identified on several regulatory databases including: EMAP, FINDS, RCRA NonGen, CA Haznet, and ECHO databases. According to the Radius Report, this tenant was a former hazardous waste generator, last generating waste in 2009; no violations were reported by EDR. This tenant was also identified on the HAZNET database for the removal of various quantities of off-specification, aged or surplus organics; unspecified hazardous wastes; and latex waste under EPA ID No. AZR000047704 between 2005 and 2006. As noted, this facility is no longer present on the property. Based on this information, this listing is not suspected to be of a significant environmental concern to the Subject Property; and no further action or investigation is warranted at this time.

Kiddie Kandids, a former tenant of the Subject Property was identified several regulatory databases including EMAP, FINDS, ECHO, and RCRA NonGen databases. According to the Radius Report, this tenant was a historic small, conditionally exempt and non-generator of silver as early as 2007 under EPA ID No. AZR000504316, likely due to photo processing waste. As noted, this facility is no longer present on the property. Based on this information, this listing is not suspected to be of a significant environmental concern to the Subject Property; and no further action or investigation is warranted at this time.

Portrait Innovations, a former tenant of the Subject Property was identified on several regulatory databases including: RCRA NonGen, FINDS, Manifest, ECHO and EMAP databases. According to the Radius Report, this tenant was a historic small quantity, conditionally exempt, and non-generator of silver as early as 2005 under EPA ID No. AZR000500827, likely due to photo processing waste. As noted, this facility is no longer present on the property. Based on this information, this listing is not suspected to be of a significant environmental concern to the Subject Property; and no further action or investigation is warranted at this time.

Bed Bath & Beyond, a current tenant of the Subject Property was identified on the EMAP database. According to the Arizona Department of Environmental Quality (ADEQ), this tenant is a conditionally exempt small quantity hazardous waste generator, and the site reconnaissance of the hazardous waste storage area did not identify any environmental concerns. Thus, this listing does not represent an environmental concern.

5.1.2 Adjoining / Surrounding Property Listings and Findings

CBRE considered the following factors to determine if sites on the list have a likelihood to represent an environmental concern to the Subject Property:

- The regulatory status and specific database listing on which the site is identified.
- The topographic position, direction, and distance of the identified site relative to the Subject Property.
- Local soil conditions in the Subject Property area.
- The known or inferred groundwater flow direction in the Subject Property area.
- Surface and subsurface obstructions and preferential pathways (e.g., buildings, roads, sewers, utility service lines, rivers, lakes, and ditches) between the identified site and the Subject Property.

Adjoining Properties

The adjoining properties were not identified in the Regulatory Database.

Surrounding Properties

No releases have been reported for any of the listed surrounding properties, the closest of which is over 0.1-mile from the property. Given a variety of factors including intervening distance, groundwater flow, and/or regulatory status, the sites in the surrounding area identified during CBRE's regulatory database review are not considered a REC to the Subject Property.

5.1.3 Discussion of Orphan Sites

The regulatory database identified two "Orphan Sites." Orphan Sites are those sites that could not be mapped or "geocoded" due to inadequate address information. CBRE attempted to locate these sites via a review of street maps, vehicular reconnaissance and/or interviews with people familiar with the area. Based on the information reviewed by CBRE, no Orphan Sites were identified within the AMSD.

5.2 Government Records Review and Findings

Summary of Findings

The following table summarizes regulatory agencies that were contacted for records and the response status on the Subject Property and/or surrounding sites of interest.

Agency	Contact	Contact No.	Date	Response

5.2.1 Municipal Records Review and Interviews

The status of the request for information and/or interviews from municipal agencies is described below:

Building Department
Based on building permits, the existing Subject Property improvements were constructed in 2003. No information of environmental concern was noted in the available records.
Tax Assessor
According to the tax assessor records, the Subject Property improvements were constructed on a 74.3-acre parcel. The Subject Property is identified on local tax maps as parcel # 215-04-721C. The existing Subject Property improvements were constructed in 2003.
Fire Department
The response from the Fire Department included the following information with regards to the Subject Property: 2003 permit for LPG exchange program 2008 permit for installation of 210-gallon generator base tank, 2016 permit for installation of cryogenic tank for cryotherapy

Maricopa County Air Quality Department

The response from the County Health Department included the following information with regards to the Subject Property: 2008 application for non-title V air quality permit for diesel generator; response from Maricopa County Air Quality Department indicating permit not required due to proposed emissions/ equipment under threshold levels requiring permit.

5.2.2 State Agency Records Review and Interviews

The status of the request for information from state agencies and the information received is described below:

Arizona Department of Environmental Quality (ADEQ)

Information was obtained for the facilities identified in [Section 5.1](#) and summarized in that section.

5.2.3 Environmental Permits

Based on available information reviewed by CBRE, no environmental permits such as wastewater discharge, National Pollutant Discharge Elimination System (NPDES), air emissions, or petroleum bulk storage (PBS) tank registrations are required at the Subject Property. Of note, as discussed in [Section 7.9](#), at least one drywell was observed at the property which may require registration with te ADEQ.

6.0 QUESTIONNAIRES AND INTERVIEWS

CBRE sent a User Questionnaire to the User or conducted interviews as tabulated below. The purpose of the User Questionnaire is to determine the User's knowledge of environmental concerns related to the Subject Property. The purpose of the interviews is to obtain information indicating potential RECs in connection with the Subject Property, which were not apparent during CBRE's site reconnaissance or historical review. This includes hazardous waste or toxic material releases and affected media, and conditions, which may not have been apparent at the time of the site reconnaissance, and to satisfy the User interview and all appropriate inquiry requirements.

Interview / Questionnaire Response Summary

Interviews / Questionnaires				
Name	Affiliation	Telephone No.	Questionnaire	Interview
101 & Scottsdale LLC and the Arizona State Land Department	User	480.398.2543	Not Completed	Not Completed
Shane Miller	Maintenance Supervisor, YAM Properties	480-364-6952	Not Completed	Completed

The information obtained from interviews identified no environmental concerns associated with the Subject Property.

6.1 Subject Property Representative Interviews

6.1.1 User

The User did not provide a completed User Questionnaire.

6.1.2 Key Site Manager

Historical Site Use

According to Shane Miller, the Maintenance Supervisor, who has been involved with the Subject Property for the past four years, the Subject Property was improved with the current improvements since 2003.

Proceedings Involving the Subject Property

According to Shane Miller, they had no knowledge of pending, threatened, or past litigation, administrative proceedings, or notices from governmental agencies regarding violations of environmental laws regarding hazardous substances or petroleum products involving the Subject Property. Further, they were unaware of any environmental liens or Activity and Use Limitations (AULs) related to the Subject Property.

6.1.3 Occupants/Operators

Additional occupants were not interviewed as part of this assessment.

6.1.4 Past Owners

CBRE was unable to locate the former owner of the Subject Property.

7.0 SITE RECONNAISSANCE

Summary Findings

Based on the observations or other information obtained during the site reconnaissance no significant environmental concerns were identified.

However, CBRE observed at least one drywell on-site during site reconnaissance. The drywells do not appear to be registered with ADEQ.

7.2 Site Reconnaissance Observations

During the Subject Property reconnaissance, CBRE conducted a visual assessment for indications of environmental concerns at the Subject Property. Consistent with the ASTM Standard, an effort was made to identify the presence of the following tabulated items, which could indicate the potential presence of RECs on the Subject Property. Observations at the Subject Property are described in greater detail below the table.

7.3 Chemical Storage and Usage

The Subject Property operates as a multi-tenant retail center. No manufacturing, fabrication or assembly operations are conducted. Limited amounts of cleaning, swimming pool, and maintenance supplies are present for onsite use and retail sale, but are present in small quantities. A Safety Kleen parts washer is present at C2 Tactical for cleaning firearms; waste solvent is removed by Safety Kleen and no staining, spillage, or leakage was observed. The storage of observed chemicals appeared satisfactory.

7.4 Bulk Storage Tanks

ASTs

Location	Size (g)	Age (yrs)	Product	Secondary Containment	Construction Type	Staining	Concern
Verizon Wireless Cellular Equipment Enclosure	200	14	Diesel	Yes	Steel	Unknown (no visual access)	No

The Subject Property has a backup generator which includes a 200-gallon tank. The tank was located in a locked compound and could not be visually observed. However, based on experience with diesel generators/base tanks at other sites, CBRE does not consider the AST to represent a REC.

7.5 Waste

7.5.1 Non-Hazardous Waste

Solid Waste

Solid Waste Type	Disposal Location	Container Type	Disposal Provider	Disposal Frequency	Concern
Solid waste	Throughout property	Dumpsters	Waste Management and Republic	Weekly	No

Non-hazardous solid waste is disposed of in dumpsters and is removed from the Subject Property on a regular basis. Potential sources of contamination, such as waste oil or automobile batteries, were not observed in the vicinity of the dumpsters. Minor amounts of staining were observed near some of the dumpsters. The staining appeared superficial and limited in extent. It is CBRE's opinion that this is a *de minimis* condition and is not considered a REC.

Liquid Waste

Liquid Waste Type	Disposal	Container Type	Disposal Provider	Disposal Frequency	Concern
Restaurant kitchen oil/grease	Recycled offsite by third-party contractors	Steel	Misc	As needed	No

Restaurant tenants utilize containers for the storage of kitchen grease. These containers are maintained by various third-party contractors, and are emptied on an as needed basis. The presence of grease containers is not considered an environmental concern.

Sanitary Waste

No operations, likely to require a significant waste water discharge, were noted by or reported to CBRE. Water that enters the sanitary system is routed to the city's treatment plant.

7.5.2 Hazardous Waste

Solid

Hazardous waste per the following schedule is generated on the Subject Property:

Solid Waste Type	Disposal	Container Type	Disposal Provider	Disposal Frequency	Concern
Ignitable, corrosive acidic, corrosive basic, reactive, and toxic hazardous waste (Bed Bath & Beyond)	Third party contractor	Plastic	Third party contractor	Quarterly	No
Lead bullets (C2 Tactical)	Firing Range Services (FRS)	Uncontained until removed (see below)	FRS	As needed	No

C2 Tactical Gun Range operates an indoor gun range within the tenant space. The indoor gun range has a concrete paved floor and no areas of exposed subsurface were observed. Lead containing bullet fragments within the range are mined on a regular basis by FRS. FRS' services include maintenance, cleaning & treatment of lead contaminated surfaces, reduction in airborne lead (booths, walls, floors, equipment, backstops, ventilation systems, etc.), lead/brass reclamation, and recycling. Based on the fact that the indoor shooting range is equipped with a paved surface and mining is conducted on a regular basis, this tenant is not suspected to have impacted the Subject Property and does not represent an REC.

In addition, CBRE identified several ignitable, corrosive acidic, corrosive basic, reactive, and toxic hazardous waste storage containers in the stock room of Bed Bath & Beyond. No floor drains or sumps were observed in the vicinity of the stored hazardous waste and housekeeping was satisfactory. The waste containers were generally in good condition, capped and did not exhibit evidence of significant spillage or leakage. The waste containers are stored on impervious surfaces. The wastes are removed on a quarterly basis. No concerns are associated with this waste generation.

Universal Waste

Small quantities of universal waste are also generated by Bed Bath & Beyond. Housekeeping was satisfactory with waste containers in good condition and capped. The waste containers are stored on impervious surfaces. The wastes are removed on a quarterly basis. No concerns are associated with this waste generation.

7.6 Floor Drains and Sumps

Location	Type	Waste Received	Discharge Location	Stains, Spills and/or Leaks	Concern
Restaurants	Interior drains/grease traps	Restaurant kitchen runoff	Sanitary sewer	No	No

Standard interior sanitary drains were noted in the restaurant kitchens. The drains tie into associated grease traps. No staining indicative of dumped materials was noted.

The grease traps collect fats, oils, and grease from restaurant kitchens prior to discharge to the sanitary sewer. According to the site contact, the grease traps are pumped on a regular basis by contracted disposal companies. The presence of the grease traps is not considered an environmental concern to the Subject Property.

7.7 Transformers and Other Electrical Equipment

CBRE observed utility-owned, pad-mounted transformers at the Subject Property. Based on the date of construction of the Subject Property improvements, it is unlikely that the transformers, which were not labeled, contain PCBs. The electrical equipment CBRE observed appeared to be in good condition, free of leakage.

In accordance with *Title 40—Protection of Environment, Chapter 1—Environmental Protection Agency, Subchapter R—Toxic Substance Control Act (TSCA), Part 761—Polychlorinated Biphenyls (PCBs), Manufacturing, Processing, Distribution in Commerce, and Use Prohibitions*, the owner of the transformers, Arizona Public Service, is responsible for the transformers' maintenance and remediation in the event of a leak.

7.8 Compactors, Balers, and Other Mechanical Equipment

Location	Type	Age	PCB Containing	Condition	Concern
Dick's Sporting Goods	Baler	Unknown	Unlikely	Good	No
Multiple	Compactors	Unknown	Unlikely	Good	De minimus staining observed at two compactors

CBRE observed compactors and one baler on the Subject Property. The manufacture of PCBs was banned in 1979. Based on the age of this equipment, it is unlikely that PCB-containing electrical equipment is present.

7.9 Wells

At least one drywell used for the disposal of stormwater runoff was observed on the property. The use of drywells for this purpose in Arizona is common, and the presence of drywells is not considered an environmental concern. However, the onsite drywell(s) do not appear to be registered with the Arizona Department of Environmental Quality (ADEQ). As such, the proper registration of the onsite drywell(s) in accordance with ADEQ requirements may be prudent.

7.10 Stormwater

Stormwater runoff is directed to onsite perimeter retention areas and at least one drywell. No staining was observed around the drywell and no Subject Property operations were observed that could potentially introduce contaminants into the drywell. However, as previously discussed, the onsite drywell(s) is not registered with ADEQ.

8.0 NON-ASTM SCOPE CONSIDERATIONS

Summary Findings

Observations and/or documentation related to the Non-ASTM Scope Considerations addressed in this section resulted in no identification of BERs or other environmental concerns.

8.1 Asbestos-Containing Materials (ACM)

Based on the age of the Subject Property improvements it is unlikely that appreciable quantities of asbestos-containing materials (ACM) have been used in the construction of the existing improvements; however, flooring materials, mastics, and caulking may contain asbestos. These materials are in good condition and the potential for fiber release is low. In the event that building maintenance, renovation, or demolition requires the removal or disturbance of the suspect ACM, the materials should be characterized for asbestos by a reliable method. All activities involving ACM should be conducted in accordance with governmental regulations.

8.2 Lead-Based Paint (LBP)

Since the Subject Property was constructed after the Consumer Product Safety Commission's 1978 ban on the sale of LBP to consumers and the use of LBP in residences, it is unlikely that LBP exists in locations and quantities suspected to represent an environmental concern.

8.3 Water Intrusion, Staining and Potential Microbial Growth

Although microbial growth is ubiquitous and may occur in a very short time span, an effort was made to identify conspicuous microbial growth and areas of apparent water intrusion/staining in the common areas surveyed.

No visual or olfactory indications of water damage or microbial growth were observed. No concerns regarding microbial growth or musty smells were reported to CBRE. According to Shane Miller, Maintenance Supervisor, there are no known water leaks, infiltration, or ponding concerns and there are no known microbial growth problems.

8.4 Lead in Drinking Water

The Subject Property receives its drinking water from the City of Phoenix. The City tests its water before it enters the distribution system. The water supplied to the Subject reportedly meets federal and state drinking water standards, including those for lead and copper.

8.5 Wetlands

CBRE reviewed the applicable United States Fish and Wildlife Service National Wetlands Inventory (NWI) map and USGS quadrangle map. Based on this information, no wetland resources were identified on or adjoining the Subject Property.

8.6 Radon

According to the *Table Version of EPA Radon Zones by County* list maintained by the USEPA, radon concentrations in Maricopa County County average between 2.0 to less than 4.0 pCi/L, which is below the 4.0 pCi/L action level established by the USEPA and places the Subject Property in an EPA Radon Zone 2. Based solely on this data, radon does not represent an environmental concern at this time.

9.0 VAPOR ENCROACHMENT CONDITIONS (VECS)

CBRE conducted a “Tier I” (non-intrusive) Vapor Encroachment Screening (VES) on the Subject Property in accordance with the methodology set forth in ASTM E 2600-15 “*Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*”. During the VES, the Area of Concern (AOC) was minimized using the methodology in the ASTM Screening for Vapor Encroachment onto Property Involved in Real Estate Transactions. The purpose of the Tier I VES is to conduct an initial screen to identify, to the extent feasible, the potential for a vapor encroachment condition (VEC) in connection with the Subject Property with respect to chemicals of concern that may migrate as vapors into the vadose zone of the Subject Property as a result of contaminated soil and/or groundwater on or near the Subject Property.

This VES utilized readily available data sources previously discussed in this Phase I ESA to include the type of soils, geology and groundwater characteristics of the Subject Property area (Section 3.5 Physical Site Setting) as well as known or potentially contaminated sites as identified on Federal, State, tribal and local databases. CBRE also utilized previously discussed standard historical sources of information to identify potential historical sources of contamination on the Subject Property and surrounding properties which may be indicative of a VEC. This data collection and analysis was coupled with our site reconnaissance of the Subject Property and surrounding properties.

Historical and current uses of the Subject Property were not identified to likely represent a VEC. Additionally, impacted properties were identified in CBRE’s regulatory database review; however, based upon groundwater flow direction and/or the furthest known extents of the contamination, none of these properties are suspected of having petroleum or chemical contaminant plumes that would be identified as a VEC. Therefore, CBRE concludes that a VEC can be ruled out.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 11/21/2022 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

AZ AST: The Aboveground Storage Tank database contains registered ASTs. The data come from the Department of Environmental Quality's Arizona UST-DMS Facility and Tank Data Listing by City database.

A review of the AZ AST list, as provided by EDR, has revealed that there are 2 AZ AST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 11/21/2022 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 01/03/2022 has revealed that there is 1 PFAS ECHO site within approximately 0.25 miles of the target property.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

AZURITE (Arizona Unified Repository For Informational Tracking Of The Environment) is the Arizona Department of Environmental Quality (ADEQ) database that is used for environmental enforcement and compliance reporting to the Permit and Compliance (PCS) system and to the Air Facility System Universal Interface (AFS-UI).

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

1.0 EXECUTIVE SUMMARY

We have performed this Phase I ESA in conformance with the scope and limitations of ASTM Phase I Environmental Site Assessment Practice E1527-13 of the Robert Ralph Trust property addressed as 7000 East Mayo Boulevard in Phoenix, AZ (Subject Property). The ASTM Standard was designed to meet the requirements of the United States Environmental Protection Agency's (USEPA's) All Appropriate Inquiries (AAI) into the previous ownership and uses of the property consistent with good commercial and customary practice as defined at 42 U.S.C. §9601(35)(B). The purpose of this Phase I ESA was to assess existing site conditions and render an opinion regarding the presence of recognized environmental conditions in connection with the Subject Property in accordance with USEPA AAI requirement. Any exceptions to, or deletions from, this practice are described in [Section 11.0](#) of this report.

The Subject Property, which is situated in a suburban area generally characterized by a mix of commercial and residential development, as well as vacant desert land, consists of a 74.308-acre tract of land improved with a 22-building, 574,224 SFR, power retail center referred to as Scottsdale 101 that was constructed in 2003. The Subject Property is currently anchored by a Harkins Theater, Bowlmor AMF bowling alley, CM2 Tactical gun range, Ethan Allen, Ashley Furniture, Hobby Lobby, Bed Bath & Beyond, Eos Fitness, PGA Tour Superstore, and Dick's Sporting Goods and includes approximately 44 smaller tenants. The buildings are one- and two-stories without subgrade levels. Of note, Building No. 5 has been razed and a new building is currently under construction. This building is expected to be completed later this year. Additional on-site improvements include paved surface and landscaped areas as well as an area of vacant desert land on the northwest corner of the site.

Prior to the construction of the current on-site improvements in 2003, the Subject Property was undeveloped desert land. Since the construction of the current retail center, the Subject Property has been occupied by various retail, commercial, and restaurants tenants. No historical tenants of environmental concern were identified.

A site reconnaissance of the Subject Property was performed by Amanda Plagge representing CBRE on January 6, 2020. Mr. Shane Miller, the Facilities Manager at the Subject Property, was CBRE's representative site contact and cited as having been affiliated with the Subject Property for the past 2 years. During CBRE's site reconnaissance, operations consistent with commercial retail, restaurant, fitness, theater and gun range activities were noted on-site, and no evidence of environmental concerns were identified with current Subject Property operations.

A review of the Regulatory Database Report identified several former tenants of the Subject Property including Home Depot, Kiddie Kandids, Portrait Innovations on the AZ EMAP, FINDS, ECHO, RCRA-NONGEN, AZ Manifest, and CA HAZNET databases. In addition, a current tenant, Bed Bath & Beyond, was identified on the AZ EMAP database. Please refer to [Section 5.1](#) for additional discussion regarding these regulatory database listings.

RECOGNIZED ENVIRONMENTAL CONDITIONS

The term Recognized Environmental Conditions (RECs) as defined by ASTM Standard E 1527-13 is "...the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment."

This assessment has revealed no evidence of RECs in connection with the Subject Property.

CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS

A Controlled Recognized Environmental Condition (CREC) as defined by ASTM Standard E 1527-13 refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

This assessment has revealed no evidence of CRECs in connection with the Subject Property.

HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS

A historical recognized environmental condition (HREC) as defined by ASTM refers to a REC resulting from a past release of any hazardous substances, or petroleum products that has occurred in connection with the Subject Property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the Subject Property to any required controls (for example, Subject Property use restrictions, activity and use limitations, institutional controls, or engineering controls).

This assessment has revealed no evidence of HRECs in connection with the Subject Property.

BUSINESS ENVIRONMENTAL RISKS

The ASTM Standard was designed to address Business Environmental Risks (BERs) that are risks that are not required to meet the AAI requirement, but may have a material environmental or environmentally driven impact associated with the current or planned land use. Non-scope items considered in this Phase I ESA are discussed in Section 8.0.

This assessment has revealed no BERs in connection with the Subject Property.

RECOMMENDATIONS

Based on the findings of this assessment, no further investigation is recommended at this time.

2.0 INTRODUCTION

2.1 General

CBRE was retained by JPMorgan Chase Bank, N.A. (“Client” or “User”) to prepare a Phase I ESA, in conformance with ASTM International's Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process E 1527-13 and Client's Scope of Work on the Subject Property in accordance with our Agreement dated December 20, 2019, and the Conditions and Limitations described herein.

Consultant acknowledges and agrees that JPMC may provide the Report (as hereinafter defined) generated by Consultant and information and materials related to or resulting from the Services provided by Consultant to its legal, financial and other advisors, to participants or assignees of any indebtedness secured by the Sites, and to lenders, tenants and purchasers, whether current or prospective, of the Sites. The Report may be relied on by JPMC, its participants, co-lenders, and assignees of any indebtedness secured by the Site, and any others as noted in the Schedule to be sent copies.

2.2 Purpose

The purpose of this report is to identify potential RECs in connection with the Subject Property, using the methodology recommended by ASTM International for a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous Subject Property owner, or bona fide prospective purchaser defenses to CERCLA liability and/or to help understand potential environmental conditions that could materially impact the operation of the business associated with the Subject Property. Specifically, this methodology is referred to as *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process Designation: E 1527-13*.

2.3 Scope

This assessment consisted of reviewing readily available information and environmental data relating to the Subject Property; interviewing readily available persons knowledgeable about the Subject Property; reviewing readily available maps, aerial photographs and records maintained by federal, state, and local regulatory agencies; and conducting a visit to the Subject Property.

The Client is advised that federal, state, and local laws may impose environmental assessment obligations beyond the scope of this practice.

The specific scope of this assignment included the following:

Subject Property Reconnaissance

A reconnaissance of the Subject Property was performed to characterize conditions and assess the likelihood of identifying RECs in connection with the Subject Property. This includes consideration of observed adjoining and surrounding property uses, natural surface features,

surrounding roadways, and other adjoining and nearby improvements. To the extent that they can be visually and/or physically observed, current and past uses of the Subject Property, adjoining and surrounding area, and associated known or potential environmental concerns and RECs were documented. Photographs taken as part of the Subject Property reconnaissance are provided in the [Photographs](#) Appendix of this report.

Interviews

This included a reasonable effort to Interview past and present owners and occupants, as well as government representatives to obtain information on present and previous on-site activities potentially resulting in environmental degradation of the Subject Property or adjoining properties. A reasonable effort was also made to interview the user or their representative to assist the user and the environmental professional in gathering information from the user that may be material to identifying RECs. In accordance with ASTM 1527-13, questions and/or questionnaires have been established specific to 1) key site contact; 2) past and present owners and occupants (if not the key site contact); and 3) the User or representative(s). These questionnaires are in [User and Pre-Survey Questionnaires](#) Appendix of this report.

Previous Reports and Documentation

If provided, the Phase I ESA process included the review of information such as previously prepared appraisals, building plans and specifications, and environmental reports from the User. Copies of pertinent documents provided to and reviewed by CBRE are included in the [Correspondence and Supporting Documents](#) of this report.

Historical Documents

CBRE reviewed readily available historical documents to identify previous activities on and in the vicinity of the Subject Property. This includes, topographic maps, aerial photographs, city directories, Sanborn Fire Insurance Maps and atlases, if available, provided by Environmental Data Resources, Inc. (EDR) as described within Section [4.0 HISTORICAL USE](#). Copies of these documents are included in [Maps and/or Historical Aerial Photographs](#) Appendix of this report.

Regulatory Databases

The Phase I ESA process included reviewing readily available environmental databases maintained by federal, state, and local agencies within the approximate minimum search distances as described within Section [5.0 REGULATORY INFORMATION](#) of this report. A copy of the environmental Regulatory Database Report (Regulatory Database), provided by EDR can be referenced in [Regulatory Database Report](#) Appendix of this report.

Regulatory Agency File and Records Review

CBRE reviewed readily available environmental databases maintained as files, records, or reports by federal, state, and local agencies, as applicable, to assess environmental conditions at the Subject Property, and as appropriate the adjoining or surrounding properties, as described within Section 5.2 [Regulatory Agency File and Records Review](#). A copy of the records can be referenced in the [Correspondence and Supporting Documents](#) Appendix of the report.

Vapor Encroachment Screening

CBRE conducted a “Tier I” (non-intrusive) Vapor Encroachment Screening (VES) on the Subject Property in accordance with the methodology set forth in ASTM E 2600-15 “*Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*” as described in Section [9.0 VAPOR ENCROACHMENT CONDITIONS \(VECs\)](#). CBRE utilized applicable industry standard methodology for conducting the VES.

Non-ASTM Scope Considerations

Environmental issues or conditions not included in CERCLA’s definition of hazardous substances (42 U.S.C. §9601(14)), or do not otherwise present potential CERCLA liability at a property that are outside the scope of this practice that have been considered and documented in Section [8.0 NON-ASTM SCOPE CONSIDERATIONS](#). This may also include standards or protocols for the assessment of potential hazards and conditions associated with non-scope conditions developed by governmental entities, professional organizations, private entities, or the User of this Phase I ESA.

Asbestos

CBRE conducted a visual survey of readily accessible common areas to identify the presence of the most obvious and common types of suspect ACM. The basis for “suspect” determination is taken from the materials listed in Appendix G of the USEPA publication *Managing Asbestos in Place* (also known as the Green Book). Building materials listed within Appendix G of the Green Book are considered to be suspect ACMs at the Subject Property. The suspect ACM screening is not intended for formal identification or management of asbestos in building materials that might be disturbed by demolition, abatement, renovation, or repair work.

Lead Based Paint

CBRE evaluated the age of the Subject Property to determine whether it is predisposed to contain lead-based paint (LBP), and if the presence of LBP is likely, made observations of the condition of painted surface. In the course of conducting observations for the presence of LBP, only representative accessible portions of the Subject Property improvements were inspected. In those observed portions, such observations were limited to representative areas

that were readily accessible, easily visible, and safe with respect to the field observer. For this reason CBRE does not warrant that findings represent conditions in unobserved areas. The limited observations for lead-based paint are not to be construed as a in-depth LBP survey.

Sample Collection and Analysis

Testing, if any, of building materials, was designed solely to meet the requirements of the client's scope of work, not to meet any local, state or federal regulations and shall not be utilized as such, unless indicated herein.

Wetlands

A wetland delineation survey was beyond the scope of this assessment. CBRE reviewed the applicable United States Fish and Wildlife Service National Wetlands Inventory (NWI) map and USGS quadrangle map. Observations were made for general wetland features.

Radon

CBRE reviewed published radon occurrence maps to determine whether the site is located in an area with a propensity for elevated radon concentrations.

2.4 Data Gaps

According to § 3.2.21 of ASTM Standard E 1527-13, a data gap is a lack of or inability to obtain information required by the ASTM Standard despite good faith efforts to gather same. Data gaps may result from incompleteness in any of the activities required by the ASTM Standard. The following data gaps were identified in connection with this report:

Data Gap Detail	Significance of Data Gap
Site history not conducted in 5-year intervals (See § 4)	Low - not likely to alter Report's conclusions due to information reviewed from historical sources of information such as aerial photographs, historic topographic maps, city directory abstracts, fire insurance maps, and interviews with individuals who were familiar with the historical use of the Subject Property.
User Questionnaire not returned to CBRE	Low - not likely to alter Report's conclusions
FOIAs not returned (See § 5.2)	Unknown - However, if receipt of FOIAs alters the Report's conclusion, the client will be notified
Unable to locate or interview former site owner or operator	Low - not likely to alter Report's conclusions

None of the data gaps affected the ability of the Environmental Professionals involved in this assessment to identify RECs in connection with the Subject Property, as defined by ASTM.

The Subject Property is improved with a 22-building, 574,224 SFR, power retail center referred to as Scottsdale 101 that was constructed in 2003. The Subject Property is currently anchored by a Harkins Theater, Bowlmor AMF bowling alley, CM2 Tactical gun range, Ethan Allen, Ashley Furniture, Hobby Lobby, Bed Bath & Beyond, Eos Fitness, PGA Tour Superstore, and Dick's Sporting Goods and includes approximately 44 smaller tenants. Of note, Building No. 5 has been razed and a new building is currently under construction. This building is expected to be completed later this year.

No tenants, occupants, or operations were identified on the Subject Property that are considered an environmental concern to the Subject Property. However, the following tenants warrant mention:

Fix 24 Chiropractic

The chiropractic office utilizes digital x-ray equipment; no photo developing solutions are used and no silver containing wastes are generated.

C2 Tactical Gun Range

C2 Tactical Gun Range operates an indoor gun range within the tenant space. The indoor gun range has a concrete paved floor and no areas of exposed dirt or subsurface were observed. The lead containing bullet fragments within the range are mined on a regular basis by Firing Range Services (FRS). The most recent service was conducted in November 2019, and over 30,000 pounds of lead bullets were recovered. FRS' services include maintenance, cleaning & treatment of lead contaminated surfaces, reduction in airborne lead (booths, walls, floors,

equipment, backstops, ventilation systems, etc.), lead/brass reclamation, and recycling. FRS fully complies with federal, state and local standards. Based on the fact that the indoor shooting range is equipped with a paved surface and mining is conducted on a regular basis, this tenant is not suspected to have impacted the Subject Property and does not represent a REC.

Verizon and AT&T

CBRE observed two wireless telecommunication facilities located along the northern border of the site. These facilities are operated by AT&T and Verizon Wireless. The equipment consists of mounted panel antennas within the two pylon signs in addition to three equipment cabinets located adjacent to the pylon signs. An emergency generator is associated with the Verizon Wireless equipment cabinet enclosure and operations. Please refer to [Section 7.4](#) for further discussion of same. This equipment is not suspected to be of environmental concern.

Bed Bath & Beyond

CBRE identified several universal waste non-aerosol, ignitable, corrosive acidic, corrosive basic, reactive, and toxic hazardous waste storage containers in the stock room. No floor drains or sumps were observed in the vicinity of the stored hazardous waste and housekeeping was satisfactory. The waste containers were generally in good condition, capped and did not exhibit evidence of significant spillage or leakage. The waste containers are stored on impervious surfaces. The waste manifests observed appeared to be in order. The wastes are removed by on an as needed basis by SteriCycle. No concerns are associated with this waste generation.

Restaurant Tenants

Restaurant tenants utilize metal and plastic containers for the storage of kitchen grease. These containers are maintained by various third-party contractors, and are cleaned out on an as needed basis. In addition, a total of 16 below grade grease interceptors were observed on-site. The interceptor collects fats, oils and grease from sinks and wash water associated with the cafeteria prior to discharge to the sanitary sewer. According to Mr. Miller, the interceptors are cleaned out on a regular basis by various contracted disposal companies. The presence of this equipment is not expected to be of a significant environmental concern to the Subject Property.

3.4 Adjoining and Surrounding Land Use

The Subject Property is located in a suburban setting characterized by commercial and residential development as well as vacant desert land as tabulated below:

Direction	Adjoining Properties	Surrounding Properties
North	Arizona State Route 101.	Vacant desert land.
East	North Scottsdale Road, across which are vacant desert land and an area under construction.	Vacant desert land.

Direction	Adjoining Properties	Surrounding Properties
Southeast	The intersection of E. Mayo Boulevard and N. Scottsdale Road, across which is Bell Lexus North Scottsdale (18555 N. Scottsdale Road).	Commercial development and vacant desert land.
South	East Mayo Boulevard, across which are a commercial office buildings (18500 N. Allied Way and 6811 E. Mayo Boulevard) and a The Shoppes at Chauncey Ranch (7077-7111 E. Mayo Boulevard).	Commercial and residential development.
Southwest	The intersection of E. Mayo Boulevard and N. 68th Street, across which are the Ninety Degrees Apartments (18440 N 68th Street).	Commercial and residential development as well as vacant desert land.
West	Vacant desert land.	Residential development and vacant desert land.

No tenants, occupants, or operations were identified on the adjoining or surrounding properties that are considered an environmental concern to the Subject Property. However, several adjoining and surrounding properties were identified on regulatory databases indicative of environmentally sensitive operations. Please see [Section 5.1](#) of this report for additional discussion regarding these facilities.

3.5 Physical Setting

CBRE evaluated the general physical setting of the Subject Property and vicinity using Information regarding the topography, surface water, geology, and hydrology to evaluate the likelihood of hazardous substances or petroleum products originating from off-site sources, from within the Subject Property, or from the Subject Property to off-site receptors. The information was obtained from readily-accessible sources. Actual conditions may vary from general conditions in the area.

Physical Attribute	Description
Topography	The Subject Property gently slopes from the north-northeast to south-southwest. The topography of the area is best described as gently sloping to the south-southwest. According to the United States Geological Survey (USGS) <i>Currys Corner, AZ 7.5 Minute Series</i> topographic map, the Subject Property's topographic elevation is approximately 1592' above mean sea level (msl).
Surface Waters	No surface water bodies were observed on or bordering the Subject Property. The closest open surface water to the Subject Property is the Hayden-Rhodes Aqueduct, which is located approximately 0.80-mile to the south.

Physical Attribute	Description
Wetlands	CBRE reviewed the applicable United States Fish and Wildlife Service National Wetlands Inventory (NWI) map and USGS quadrangle map. Based on this information, no wetland resources were identified on or adjoining the Subject Property.
Geology	There are no predominant geological surface features such as rock outcroppings on the Subject Property. Phoenix, Arizona is located in the West Salt River Valley sub-basin of the Phoenix Active Management Area of the Basin and Range physiographic province. This basin is generally characterized as an alluvial filled basin, bounded by elongated mountain ranges. The basin can extend to depth of greater than 1,500 feet and include fine to coarse-grained sediments eroded from surrounding mountains. There are three stratigraphic units that may comprise the alluvial basin in the vicinity of the site in Phoenix. In descending order the three layers are the Upper Alluvial Unit, the Middle Fine-Grained Alluvial Unit, and the Lower Conglomerate Alluvial Unit.
Soils	According to the USDA NRCS Web Soil Survey, soils are expected to be of the Gilman loams series and the momoli gravelly sandy loam series with 1 to 5 percent slopes. These soils are derived from mixed alluvium. Permeability of these soils is classified as well drained.
Groundwater	According to the USEPA <i>Groundwater Handbook, Vol. 1 Groundwater and Contamination, September 1990</i> , the water table typically conforms to surface topography. This means that the direction of flow for shallow groundwater is generally from higher elevations to lower elevations. Localized flow direction, however, may vary as a result of rainfall, development, geologic characteristics, nearby surface water bodies, underground utilities such as storm drains, septic systems and sewers, or other influences such as the presence of high volume wells. Shallow groundwater in the vicinity of the Subject Property is anticipated to be encountered at a depth of approximately 350 feet bgs with a groundwater flow direction inferred to be to the south-southwest.

4.0 HISTORICAL USE

Subject Property Summary Findings

Prior to the construction of the current on-site improvements in 2003, the Subject Property was undeveloped desert land.

Since the construction of the current improvements, the Subject Property has been occupied by various retail, commercial, and restaurants tenants. No environmentally sensitive historical uses were identified in association with the Subject Property. However, a review of the Regulatory Database Report identified several former tenants of the Subject Property including Home Depot, Kiddie Kandids, Portrait Innovations on the AZ EMAP, FINDS, ECHO, RCRA-NONGEN, AZ Manifest, and CA HAZNET databases. In addition, a current tenant, Bed Bath & Beyond, was identified on the AZ EMAP database. Please refer to [Section 5.1](#) for additional discussion regarding these regulatory database listings.

Adjoining and Surrounding Property Summary Findings

The historical uses of the adjoining and surrounding properties consisted of undeveloped desert land. No environmentally sensitive historical uses of the adjoining or surrounding properties were identified.

A review of aerial photographs did not identify environmental concerns to the Subject Property.

4.4 City Directories

A historical City Directory Abstract provided by EDR was reviewed to assess the presence of historical occupants with potentially adverse environmental operations or conditions at the Subject Property and vicinity. Due to the dense development of the adjacent and surrounding properties, only tenants/facilities of environmental concern are identified below. The years and associated general uses and/or operations are summarized in the following table.

4.5 Chain-of-Ownership / Chain-of-Title

A copy of the Subject Property's Chain-of-Title has not been provided to CBRE for review.

4.6 Previous Reports, Plans, Surveys, and Other Historical Documentation

CBRE was provided the following previous environmental assessment of the Subject Property, relevant portions of which are included in the appendices. The information obtained was not verified for accuracy by CBRE and a critique of the report was beyond the scope of this assessment. The following is a summary of the documents provided for review:

Report Name / Address	Report Date	Preparer	Client
Phase I Environmental Assessment of Scottsdale 101, 7000 East Mayo Boulevard, Phoenix, Arizona 85054	December 7, 2015	EMG	JPMorgan Chase Bank, N.A.

According to the EMG Environmental Assessment Report, the Subject Property was undeveloped land prior to the construction of the current on-site developments. The EMG report identified similar findings to this CBRE report; however, only 10 buildings were noted on-site. In addition, EMG identified a 200-gallon emergency generator that CBRE was not granted access to at the time of site reconnaissance. This generator is not suspected of environmental concern.

In addition, EMG identified two box balers within the various tenant spaces; 12 pad mounted transformers; two hydraulic elevators; seven trash compactors; and five hydraulic dock levelers. The EMG report did not identify any RECs, CRECs, HRECs, nor BERs.

5.0 REGULATORY RECORDS INFORMATION

Summary Findings

Results of the regulatory database and regulatory records review did not identify environmental concerns to the Subject Property.

5.1 Regulatory Database

The Regulatory Database Report documents the listing of sites identified on federal, state and local (when applicable) standard source environmental databases within the approximate minimum search distance (AMSD) specified by ASTM Standard Practice for Environmental Site Assessments E 1527-13. A copy of the Regulatory Database Report is in the [Appendices](#) and is used to identify RECs in connection with the Subject Property. The listings serve to identify the known indications of the storage, use, generation, disposal, or release of hazardous substance at the Subject Property and the potential for contaminants to migrate onto the Subject Property from off-site sources in groundwater, or soil in the form of liquids or vapor.

The following table lists the number of sites as categorized by the regulatory database within the prescribed AMSD.

5.1.1 Discussion of Orphan Sites

The regulatory database identified two "Orphan Sites." Orphan Sites are those sites that could not be mapped or "geocoded" due to inadequate address information. CBRE attempted to locate these sites via a review of street maps, vehicular reconnaissance and/or interviews with people familiar with the area. Based on the information reviewed by CBRE, no Orphan Sites were identified within the AMSD.

5.1.2 Subject Property Listings and Findings

Home Depot 0409, a former tenant of the Subject Property, was identified on several regulatory databases including: EMAP, FINDS, and ECHO databases. According to the Radius Report, this tenant was registered for the operation of digital imagery and has been inactive since 2009. Digital imagery requires no photo developing solutions and no silver containing wastes are generated. This tenant was also identified on the HAZNET database for the removal of various quantities of off-specification, aged or surplus organics; unspecified hazardous wastes; and latex waste under EPA ID No. AZR000047704 between 2005 and 2006. As noted, this facility inactive, and the site is not a continuing generator of hazardous waste. Based on this information, this listing is not suspected to be of a significant environmental concern to the Subject Property; and no further action or investigation is warranted at this time.

Kiddie Kandids, a former tenant of the Subject Property was identified several regulatory databases including EMAP, FINDS, ECHO, and RCRA NonGen databases. According to the Radius Report, this tenant was a historic small, conditionally exempt and non-generator of silver as early as 2007 under EPA ID No. AZR000504316, likely due to photo processing waste. As noted, this facility inactive, and the site is not a continuing generator of hazardous waste. Based on this information, this listing is not suspected to be of a significant environmental concern to the Subject Property; and no further action or investigation is warranted at this time.

Portrait Innovations, a former tenant of the Subject Property was identified on several regulatory databases including: RCRA NonGen, FINDS, Manifest, ECHO and EMAP databases. According to the Radius Report, this tenant was a historic small quantity, conditionally exempt, and non-generator of silver as early as 2005 under EPA ID No. AZR000500827, likely due to photo processing waste. As noted, this facility inactive, and the site is not a continuing generator of hazardous waste. Based on this information, this listing is not suspected to be of a significant environmental concern to the Subject Property; and no further action or investigation is warranted at this time.

Bed Bath & Beyond, a current tenant of the Subject Property was identified on the EMAP database. According to the Radius Report, this tenant was registered for the operation of digital imagery under ID No. 145336. However, during CBRE's site reconnaissance no digital photo stations were identified. Nevertheless, digital imagery requires no photo developing solutions and no silver containing wastes are generated. As such, this listing does not represent an environmental concern.

5.1.3 Adjoining / Surrounding Property Listings and Findings

CBRE considered the following factors to determine if sites on the list have a likelihood to represent an environmental concern to the Subject Property:

- The regulatory status and specific database listing on which the site is identified.
- The topographic position, direction, and distance of the identified site relative to the Subject Property.
- Local soil conditions in the Subject Property area.
- The known or inferred groundwater flow direction in the Subject Property area.
- Surface and subsurface obstructions and preferential pathways (e.g., buildings, roads, sewers, utility service lines, rivers, lakes, and ditches) between the identified site and the Subject Property.

Adjoining Properties

Bell Lexus, located to the southeast of the Subject Property was identified on the AST database. According to the Radius Report, a 6,000-gallon aboveground storage tank and dispenser with fuel control and tank monitor were installed at the site in 2013. This facility was not identified on any other regulatory database indicative of a release or contamination event. Furthermore, this site is located hydrologically crossgradient from the Subject Property. Based on the foregoing, this site is not suspected to have impacted the Subject Property; and no additional investigation is warranted at this time.

Surrounding Properties

Surrounding properties within the AMSD were not identified in the Regulatory Database.

5.2 Government Records Review and Findings

Summary of Findings

The following table summarizes regulatory agencies that were contacted for records and the response status on the Subject Property and/or surrounding sites of interest.

Agency	Contact	Contact No.	Date	Response
Building Department	Online	602-262-7811	12/23/19	No
Tax Assessor	Online	602-506-3406	01/06/20	Yes
Fire Department	Rosa Arguelles	602-261-8025	12/23/19	No
Maricopa County Health Department	Online	602-506-6616	12/23/19	No
Arizona Department of Environmental Quality	Anthony Vinson	62-771-4354	12/30/19	Yes

5.2.1 Local Agency/Municipal Records Review

The status of the request for information from local and municipal agencies and the information received is described below:

Building Department
No response received as of the date of this report.
Tax Assessor
According to the tax assessor records reviewed, the Subject Property buildings were constructed on a 70.40-acre parcel.
Fire Department
No response received as of the date of this report.
County Health Department
No response received as of the date of this report.

5.2.2 State Agency Records Review

The status of the request for information from state agencies and the information received is described below:

Arizona Department of Environmental Quality
--

CBRE researched ADEQ online records for the Subject Property. No records were identified.

Arizona Department of Water Resources (ADWR)

CBRE researched ADWR online records for registered water wells at the Subject Property. No records were identified.

5.2.3 Environmental Permits

Based on available information reviewed by CBRE, no environmental permits such as wastewater discharge, National Pollutant Discharge Elimination System (NPDES), air emissions, or petroleum bulk storage (PBS) tank registrations are required at the Subject Property.

5.3 Environmental Liens and/or Activity and Use Limitations (AULs)

A review of available records cited in this section did not identify environmental liens or AULs associated with the Subject Property.

6.0 QUESTIONNAIRES AND INTERVIEWS

Summary of Findings

CBRE sent a User Questionnaire to the User, or conducted interviews as tabulated below. The purpose of User Questionnaire or interview is to obtain information indicating RECs in connection with the Subject Property which was not apparent during CBRE's site reconnaissance or historical review. This includes hazardous waste or toxic material releases and affected media, conditions, which may not have been apparent at the time of the site reconnaissance and to satisfy the User interview and all appropriate inquiry requirements.

Interview / Questionnaire Response Summary

Interviews / Questionnaires				
Name	Affiliation	Telephone No.	Questionnaire	Interview
Shane Miller	Subject Property	(480) 364-6952	Not Completed	Completed

The information obtained from interview identified no environmental concerns associated with the Subject Property.

6.1 Subject Property Representative Interviews

6.1.1 User

The User did not provide a completed User Questionnaire.

6.1.2 Key Site Manager

Historic Site Use

According to Shane Miller, the Facility Manager, who has been involved with the Subject Property for the past 2 years, the Subject Property was previously improved with undeveloped desert land.

Proceedings Involving the Subject Property

According to Shane Miller, they had no knowledge of pending, threatened, or past litigation, administrative proceedings, or notices from governmental agencies regarding violations of environmental laws regarding hazardous substances or petroleum products involving the Subject Property.

6.1.3 Occupants

Occupants were not interviewed as part of this assessment.

6.1.4 Past Owners

CBRE was unable to locate the Subject Property's former owner.

6.2 Interviews With Regulatory Officials

Interviews with regulatory officials were not conducted.

6.3 Environmental Liens and/or Activity and Use Limitations (AULs)

No environmental liens or AULs related to the Subject Property were identified from interview information.

7.0 SITE RECONNAISSANCE

Summary Findings

Based on the observations or other information obtained during the site reconnaissance no environmental concerns were identified.

7.2 Site Reconnaissance Observations

During the Subject Property reconnaissance, CBRE conducted a visual assessment for indications of environmental concerns at the Subject Property. Consistent with the ASTM Standard, an effort was made to identify the presence of the following tabulated items, which could indicate the potential presence of RECs on the Subject Property. Observations at the Subject Property are described in greater detail below the table.

7.3 Chemical Storage and Usage

The Subject Property operates as a multi-tenant shopping center. No manufacturing, fabrication or assembly operations are conducted. Limited amounts of cleaning supplies, lubricants, propane, paints and other chemicals used in the maintenance of the complex as well as packaged for retail are present, but are used/stored in small quantities. The storage of these materials appeared satisfactory.

7.4 Bulk Storage Tanks

The bulk storage tanks identified at the Subject Property are discussed and tabulated below:

ASTs

Location	Product	Size (g)	Age	Secondary Containment / Leak Detection	Const. Type	Staining	Concern?
Verizon Wireless Cellular Equipment Enclosure	Diesel	200	Unknown	Yes	Steel	No	No

An emergency generator was noted in the Verizon Wireless cellular equipment enclosure located along the northern boundary of the Subject Property. The emergency generator contains an integral belly tank. CBRE was not granted access to this area at the time of site reconnaissance. As such, we make no representation to the aforementioned equipment.

7.5 Solid and Liquid Waste

Solid Waste

Location	Product Type	Container Type	Area Conditions	Concern?
Throughout the Subject Property	Domestic Debris	Dumpster	Good	No
Blue Agave Mexican Cantina, Morning Jam, Chick-Fil- A, Red Robin, Blast & Brew, Panda, Umami, Bowlero, TC Twisted Curry, Cien Agaves, Bob + Roll Sushi and Grill, Tea and Light Cafe, Pino, Mr. Mesquite Taqeria, and AZ Cabob	Waste Kitchen Grease	Grease Receptacle	Good	No

Non-hazardous solid waste is disposed of in dumpsters and is removed from the Subject Property on a regular basis by several third party vendors contracted by the tenants. Potential sources of contamination, such as waste oil or automobile batteries, were not observed in the vicinity of the dumpsters.

The above tabulated restaurant tenants utilize metal and plastic containers for the storage of kitchen grease. These containers are maintained by various third-party contractors, and are cleaned out on an as needed basis. The presence of this equipment is not expected to be of a significant environmental concern to the Subject Property.

Sanitary Waste

No operations, likely to require a significant waste water discharge, were noted by or reported to CBRE. Water that enters the sanitary system is routed to the city's treatment plant.

Stormwater

Stormwater runoff collected by catch basins and roof drains is discharged into the municipal stormwater management system.

Hazardous Waste

C2 Tactical Gun Range operates an indoor gun range within the tenant space. The indoor gun range has a concrete paved floor and no areas of exposed dirt or subsurface were observed. The lead containing bullet fragments within the range are mined on a regular basis by Firing Range Services (FRS). The most recent service was conducted in November 2019, and over 30,000 pounds of lead bullets were recovered. FRS' services include maintenance, cleaning & treatment of lead contaminated surfaces, reduction in airborne lead (booths, walls, floors, equipment, backstops, ventilation systems, etc.), lead/brass reclamation, and recycling. FRS fully complies with federal, state and local standards. Based on the fact that the indoor shooting range is equipped with a paved surface and mining is conducted on a regular basis, this tenant is not suspected to have impacted the Subject Property and does not represent a REC.

In addition, CBRE identified several universal waste non-aerosol, ignitable, corrosive acidic, corrosive basic, reactive, and toxic hazardous waste storage containers in the stock room of Bed Bath & Beyond. No floor drains or sumps were observed in the vicinity of the stored hazardous waste and housekeeping was satisfactory. The waste containers were generally in good condition, capped and did not exhibit evidence of significant spillage or leakage. The waste containers are stored on impervious surfaces. The waste manifests observed appeared to be in order. The wastes are removed by on an as needed basis by SteriCycle. No concerns are associated with this waste generation.

7.6 Floor Drains and Sumps

Location	Type	Waste Received	Discharge Location	Stains, Spills and/or Leaks	Concern?
Throughout the Subject Property	Grease Interceptors (16)	Waste Kitchen Grease	Municipal	No	No
Throughout the Subject Property	Interior Drains	Sanitary Water	Municipal	No	No

Standard interior sanitary drains were noted. The drains tie into the municipal sanitary system. No staining indicative of dumped materials was noted. No sumps, oil water separators, or clarifiers were noted or reported.

A total of 16 below grade grease interceptors were observed onsite. The interceptor collects fats, oils and grease from sinks and wash water associated with the cafeteria prior to discharge to the sanitary sewer. According to Mr. Miller, the interceptors are cleaned out on a regular basis by various contracted disposal companies. The presence of this equipment is not expected to be of a significant environmental concern to the Subject Property.

7.7 Polychlorinated Biphenyls - PCBs

Electrical Transformers

Location	Number	Type	Age	Owner	PCB Containing?	Condition	Concern?
Throughout Subject Property	33	Pad-mounted	Unknown	Arizona Public Service	No	Good	No

CBRE observed 33, utility owned, pad-mounted electrical transformers at the Subject Property. Based on its age, it is unlikely that the transformer, which was not labeled, contains PCBs. The electrical equipment CBRE observed appeared to be in good condition, free of leakage.

In accordance with *Title 40—Protection of Environment, Chapter 1—Environmental Protection Agency, Subchapter R—Toxic Substance Control Act (TSCA), Part 761—Polychlorinated Biphenyls (PCBs), Manufacturing, Processing, Distribution in Commerce, and Use Prohibitions*, the owner of the transformers, Arizona Public Service, is responsible for the transformers' maintenance and remediation in the event of a leak.

Hydraulic Equipment (Elevators, Lifts, Compactors, Balers, and Others)

Location	Type	Age	PCB Containing?	Condition	Concern?
Theater	Elevators (1)	Unknown	No	Good	No
Throughout the Subject Property	Trash Compactors (5)	Unknown	No	Good	No
Throughout the Subject Property	Balers (2)	Unknown	No	Good	No
Throughout the Subject Property	Dock Levelers (5)	Unknown	No	Good	No

The manufacture of PCBs was banned in 1979. Based on the age of the improvements at the Subject Property, it is unlikely that PCB-containing hydraulic equipment is present.

Of note, during CBRE's site reconnaissance, only one hydraulic elevator was observed. However, two hydraulic elevators were referenced in a previous environmental assessment reviewed by CBRE ([Section 4.6](#)). Due to the Subject Property's age and condition, this discrepancy is not considered an environmental concern.

8.0 NON-ASTM SCOPE CONSIDERATIONS

Summary Findings

Observations and/or other documentation related to the Non-ASTM Scope Considerations addressed in this section resulted in no identification of BERs or other environmental concerns.

8.1 Asbestos Containing Materials (ACM)

Based on the age of the Subject Property improvements it is unlikely that appreciable quantities of asbestos containing materials (ACM) have been used in the construction of the existing improvements; however, flooring materials, mastics, and caulking, may contain asbestos. These materials are in good condition and the potential for fiber release is low. In the event that building maintenance renovation, or demolition require the removal or disturbance of the suspect ACM, the materials should be characterized for asbestos by a reliable method. All activities involving ACM should be conducted in accordance with governmental regulations.

8.2 Lead-Based Paint (LBP)

Since the Subject Property was constructed after the Consumer Product Safety Commission's 1978 ban on the sale of LBP to consumers and the use of LBP in residences, it is unlikely that LBP exists in locations and quantities suspected to represent an environmental concern.

8.3 Water Intrusion, Staining and Potential Microbial Growth

Although microbial growth is ubiquitous and may occur in a very short time span, an effort was made to identify conspicuous microbial growth and areas of apparent water intrusion/staining in the common areas surveyed.

No visual or olfactory indications of water damage or mold growth were observed. No concerns regarding mold or musty smells were reported to CBRE. According to Shane Miller, there are no known water leaks, infiltration or ponding concerns and there are no known mold problems.

8.4 Lead in Drinking Water

The Subject Property was constructed after the 1986 ban on lead containing solder used to sweat copper drinking water piping. As a result, it is unlikely that the site's plumbing system leaches lead in to the drinking water. Moreover, according to the local water utility, the water supplied to the Subject Property is within federal, state, and local water quality standards.

8.5 Wetlands

According to the United States Fish & Wildlife Service National Wetlands Inventory website, there are no federally regulated wetlands located on or adjacent to the Subject Property. Additionally, CBRE did not observe water bodies or vegetation indicative of wetlands on the Subject Property.

8.6 Radon

According to the *Table Version of EPA Radon Zones by County* list maintained by the USEPA, radon concentrations in Maricopa County average between 2.0 to less than 4.0 pCi/L, which is below the 4.0 pCi/L action level established by the USEPA and places the Subject Property in an EPA Radon Zone 2. Based solely on this data, radon does not represent an environmental concern at this time.

9.0 VAPOR ENCROACHMENT CONDITIONS (VECS)

CBRE conducted a “Tier I” (non-intrusive) Vapor Encroachment Screening (VES) on the Subject Property in accordance with the methodology set forth in ASTM E 2600-15 “*Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*”. During the VES, the Area of Concern (AOC) was minimized using the methodology taught in the ASTM Screening for Vapor Encroachment onto Property Involved in Real Estate Transactions Training Course. The purpose of the Tier I VES is to conduct an initial screen to identify, to the extent feasible, the potential for a vapor encroachment condition (VEC) in connection with the Subject Property with respect to chemicals of concern that may migrate as vapors into the vadose zone of the Subject as a result of contaminated soil and/or groundwater on or near the Subject Property.

This VES utilized readily available data sources previously discussed in this Phase I ESA to include the type of soils, geology and groundwater characteristics of the Subject Property area (Section 3.5 Physical Site Setting) as well as known or potentially contaminated sites as identified on Federal, State, tribal and local databases. CBRE also utilized previously discussed standard historical sources of information to identify potential historical sources of contamination on the Subject Property and surrounding properties which may be indicative of a VEC. This data collection and analysis was coupled with our site reconnaissance of the Subject Property and surrounding properties.

Historical and current uses of the Subject Property were not identified to likely represent a VEC. Additionally, impacted properties were not identified in CBRE’s regulatory database review. Therefore, CBRE concludes that a VEC can be ruled out.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/24/2019 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 06/24/2019 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Environmental Professional:

Matt Fox, Senior Environmental Consultant

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Project. I have developed and performed the all appropriate inquiries in conformance with the standard and practices set forth in 40 CFR Part 312.

1.4 RELIANCE

This report has been prepared for and is exclusively for the use and benefit of the Client identified on the cover page of this report. The purpose for which this report shall be used shall be limited to the use as stated in the contract between the client and EMG.

This report, or any of the information contained therein, is not for the use or benefit of, nor may it be relied upon by any other person or entity, for any purpose without the advance written consent of EMG. Any reuse or distribution without such consent shall be at the client's or recipient's sole risk, without liability to EMG.

2.0 INTRODUCTION

2.1 PURPOSE

The purpose of this report is to provide the Client the results of a commercially prudent and reasonable inquiry designed to identify recognized environmental conditions at the Project taking into account reasonably ascertainable information. In accordance with ASTM E1527-13, the level of environmental assessment was guided by several factors, including the type of property and the risk tolerance of the user.

The user informed EMG that the purpose of the assessment is for an acquisition.

2.2 SCOPE OF WORK

The assessment was conducted utilizing generally accepted Phase I industry standards, using American Society for Testing and Materials (ASTM) Standard Practice E 1527-13.

The Scope of Work included an evaluation of:

- Interviews with individuals knowledgeable about the Project for the purpose of gathering information regarding the potential for contamination at the Project.
- Available pertinent documents obtained by EMG or provided by the client.
- Reasonably ascertainable federal, state, and local records in an effort to identify sites of known or suspected hazardous waste activity located at or near the Project.
- The Project history in an attempt to identify possible ownership(s) and/or uses, as identified through review of reasonably ascertainable standard historical sources.
- The physical characteristics of the Project, as identified through review of reasonably ascertainable topographic data, wetlands, soils, geology, and groundwater data.
- Current Project conditions (as applicable) as they pertain to the presence or absence of: facility storage tanks, drums, containers (above or below ground), etc., transformers and other electrical equipment which utilize fluid which may potentially contain PCBs, the use of hazardous materials/chemicals and petroleum products, and/or the generation, treatment, storage, or disposal of hazardous, regulated, or medical wastes.
- An evaluation of information contained in programs such as the NPL, CERCLIS, SHWS, RCRIS, SWF, LUST, and other governmental information systems within specific search distances of the Project. This evaluation was performed to identify sites that represent a recognized environmental condition. The regulatory agency report provided is based on an evaluation of the data collected and compiled by a contracted data research company. The search is designed to meet the requirements of ASTM Standard Practice E 1527-13. The information provided is assumed to be correct and complete.
- Visual observation of the adjacent properties to identify high-risk neighbors and the potential for known or suspected contamination to migrate onto the Project.

2.2.1 ASTM E1527 NON-SCOPE CONSIDERATIONS

At the Client's request, the assessment included a screening approach for the following Non-ASTM Considerations, which are otherwise beyond the Scope of ASTM E1527-13.

NON-ASTM CONSIDERATIONS	
NON-ASTM CONSIDERATION	SCOPE OF WORK
Asbestos Containing Materials:	The identification of suspect asbestos containing materials in accessible areas. Sampling of suspect materials was not performed.

NON-ASTM CONSIDERATIONS	
NON-ASTM CONSIDERATION	SCOPE OF WORK
Radon Gas:	Radon gas propensity, through the review of the USEPA's Map of Radon Zones.
Lead Based Paint:	The identification of lead-based paint for residential and daycare properties constructed prior to 1978.
Lead In Drinking Water:	A screening for lead in water, based on information provided by the municipal water provider.
Moisture Conditions:	The identification of visible moisture conditions and conditions conducive for moisture conditions. In addition, EMG interviewed Project personnel regarding any known or suspected moisture conditions, water intrusion, or mildew like odors.
Wetlands:	Review of readily available wetlands map data available from the US Fish and Wildlife Service. A site specific wetland delineation is beyond the scope of this assessment.
Flood Zone:	Review of readily available flood zone map designations available from regulatory agencies, such as the Federal Emergency Management Agency (FEMA).

2.3 LIMITATIONS

The opinions EMG expresses in this report were formed utilizing the degree of skill and care ordinarily exercised by any prudent Environmental Professional in the same community under similar circumstances. EMG assumes no responsibility or liability for the accuracy of information contained within this report that has been obtained from the Client or the Client's representatives, from other interested parties, or from the public domain. The conclusions presented represent EMG's professional judgment based on information obtained during the course of this assignment.

Factual information regarding operations, conditions, and test data provided by the Client or the Client's representative has been assumed to be correct and complete. The conclusions presented within this report are based on the data provided, observations made, and conditions that existed specifically on the date of the assessment.

EMG's ESA cannot wholly eliminate the uncertainty regarding the presence of recognized environmental conditions and environmental business risk. The report is intended to reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions in connection with the Project. The report is limited in budget and scope. The nature of subsurface soil and ground water at the Project cannot be confirmed, given the limited budget and scope of this ESA. The report is not and should not be considered a warranty or guarantee about the presence or absence of environmental contaminants which might affect the Project. It should be understood that EMG's suggested remedy may be determined under time constraints or may be formed without the aid of engineering calculations, testing, exploratory probing, the removal of materials, or design. Furthermore, there may be other alternate or more appropriate schemes or methods to remedy the noted environmental conditions.

2.4 KEY TERMS

Business environmental risk - A risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice. Consideration of business environmental risk issues may involve addressing one or more non-scope considerations. For the purposes of this assessment, a significant business environmental risk is both included in the agreed upon scope of work and requires further action at this time.

Controlled recognized environmental condition - A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

Data gap - The lack of or inability to obtain information required by ASTM E 1527-13 despite good faith efforts is considered a data gap. A data gap is considered significant if it affects the ability of the environmental professional to identify recognized environmental conditions.

De minimis condition - A condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis conditions are not recognized environmental conditions nor controlled recognized environmental conditions.

Environmental Professional - A person meeting the education, training, and experience requirements set forth in 40 CFR 312.10(b).

Historical recognized environmental condition - A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (e.g. property use restriction, AULS, institutional controls, or engineering controls), at the time the Phase I ESA is conducted (e.g., if there has been a change in the regulatory criteria). If the EP considers this past release to be a REC at the time the Phase I ESA is conducted, the condition shall be included in the conclusion section of the report as a REC.

Material threat - A physically observable or obvious threat which is reasonably likely to lead to a release that, in the opinion of the environmental professional, is threatening and might result in impact to public health or the environment.

Practically reviewable - Information that is provided by the source in a manner and in a form that, upon examination, yields information relevant to the property without the need for extraordinary analysis of irrelevant data.

Release - Any spilling, leaking, pumping, pouring, emitting, emptying, discharging, injecting, escaping, leaching, dumping, or disposing into the environment (including the abandonment or discarding of barrels, containers, and other closed receptacles containing any hazardous substance or pollutant or contaminant), with certain exclusions as defined in 42 U.S.C. 9601 (22).

Reasonably ascertainable - Information that is publicly available, obtainable from its source within reasonable time and cost constraints, and practically reviewable.

Recognized environmental condition - The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property 1) due to any release to the environment; 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.

Standard environmental record sources - Environmental records contained in various regulatory databases, with search distances defined by ASTM E1527-13, unless otherwise specified by client in the scope of work.

Standard historical sources - Reasonably ascertainable records, including aerial photographs, fire insurance maps, property tax files, recorded land title records, USGS topographic maps, local street directories, building department records, and zoning/land use records.

3.0 USER PROVIDED INFORMATION

In order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfield's Revitalization Act of 2001 (the "Brownfield's Amendments") (if desired), the user must provide certain information (if available) identified in the User Questionnaire to the environmental professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

Within this Phase I Environmental Site Assessment, EMG's reference to the Client follows the ASTM guide's definition of user, that is, the party that retains EMG for the preparation of a baseline ESA of the Project. A user may include, without limitation, a purchaser, potential tenant, owner, existing or potential mortgagee, lender, or property manager of the Project.

3.1 USER QUESTIONNAIRE

EMG submitted the following User Questionnaire to the user pursuant to the responsibilities described in Section 6 of ASTM Standard E 1527-13. All Appropriate Inquires (40 CFR Part 312) requires that these questions be answered by or on behalf of a party seeking to qualify for limited liability protections to CERCLA liability.

#	QUESTION ASKED OF USER	RESPONSE	COMMENTS
1	Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property?	No Response	
2	Are you aware of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property?	No response	
3	Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?	No response	
4	Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?	No response	
5	Are you aware of any Activity and Use Limitations, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?	No response	
6	As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	No response	
7	Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?	No response	
8	Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user:	No response	
	Do you know the past uses of the property?	No response	
	Do you know of specific chemicals that are present or once were present at the property?	No response	

#	QUESTION ASKED OF USER	RESPONSE	COMMENTS
	Do you know of spills or other chemical releases that have taken place at the property?	No response	
	Do you know of any environmental cleanups that have taken place at the property?	No response	
9	As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property?	No response	

A completed User Questionnaire was not returned to EMG. The lack of this information represents a data gap. However, based on the other information obtained during the completion of this assessment, the lack of the User Questionnaire does not represent a significant data gap.

3.2 ENVIRONMENTAL LIEN/AUL SEARCH

The presence of an Activity and Use Limitations (AUL) at a property is an indication that there may be residual levels of hazardous substances or petroleum products present above unrestricted land use levels. Although Environmental Liens and AULs are often recorded with the property deed at the local land title office, in some cases they are filed in a separate environmental agency database or in project documentation, such as agency closure letters. ASTM E1527-13 does not require the environmental professional to undertake a review of recorded land title records and judicial records for environmental liens and AULs. Such a review is performed at the discretion of the user, based on their need to meet the requirements of 40 CFR 312.20 and 312.25.

The user did not engage EMG to review title and judicial records for environmental liens or AULs recorded against the Project. Furthermore, these documents were not provided to EMG for review. The lack of this information represents a data gap. However, based on the other information obtained during the completion of this assessment, the lack of the an Environmental AUL/Lien search does not represent a significant data gap.

3.3 PREVIOUS ENVIRONMENTAL ASSESSMENTS

In accordance with ASTM E1527-13, EMG requested that the user provide copies of previous environmental assessments for review. Furthermore, EMG may have obtained prior environmental assessments and regulatory records from local, state, and federal regulatory agencies. The purpose of reviewing prior environmental assessments is to determine if any recognized environmental conditions have previously been identified. Documentation provided to EMG which is unrelated to the identification of recognized environmental conditions may not be reviewed.

EMG was not provided with any previously conducted environmental assessment reports for the Project.

4.0 PHYSICAL SETTING

ASTM E1527-13 requires that the current 7.5-minute USGS Topographic Map (or equivalent) showing the area on which the Project is located be reviewed. Additional physical setting sources, such as soil survey maps, groundwater maps and geologic maps may be obtained and reviewed at the discretion of the environmental professional. The purpose of this review is to evaluate whether hazardous substances or petroleum products are likely to migrate to the Project.

4.1 TOPOGRAPHY

The most recent version of the USGS Topographic Map available is discussed below. Historical USGS Topographic Maps, if available, are discussed in Section 6.

4.3 HYDROGEOLOGY

Groundwater conditions at the Project are estimated based on reasonably available data such as groundwater maps, previous subsurface investigations conducted at, or in the vicinity of the Project, and local conditions. Shallow groundwater flow is generally expected to follow the ground level slope of surface elevations towards the nearest open body of water. Estimated groundwater levels may vary due to seasonal fluctuations in precipitation, local usage demands, geology, underground structures, or dewatering operations.

SOIL SERIES NAME	DRAINAGE	TEXTURE	DEPTH
Gilman	Well drained	Sandy loam	60 inches

5.0 SITE RECONNAISSANCE

The objective of the site reconnaissance is to obtain information indicating the likelihood of identifying recognized environmental conditions in connection with the property. In accordance with ASTM E1527-13, EMG attempted to visually observe the periphery of the Project and all structures to the extent not obstructed by obstacles. In addition, EMG attempted to visually observe interior common areas, maintenance and repair areas, and a representative sample of occupant spaces. In general, EMG does not look under floors, above ceilings, behind walls, in confined spaces, in transformer vaults, or in other areas not considered to be safe to access.

5.3 HAZARDOUS MATERIALS AND PETROLEUM PRODUCTS

Accessible interior and exterior areas of the Project were observed for the presence of hazardous materials and petroleum products.

EMG evaluated any observed manways, vent pipes, fill connections, concrete pads, and unknown saw cuts to determine if USTs are present at the Project, or if USTs were historically located at the Project. In addition, the Key Site Manager and other property management personnel were interviewed regarding the presence of USTs at the Project.

EMG observed the Project for the presence of potentially PCB-containing equipment such as electrical transformers and hydraulic lifts. Equipment installed after 1979 is unlikely to contain PCBs.

EMG observed the Project for visual evidence of petroleum and natural gas pipelines, such as pipeline markers.

5.8 INTERVIEWS

5.8.1 KEY SITE MANAGER

EMG attempted to interview the Key Site Manager as part of this assessment. In addition, a Questionnaire was provided to the Key Site Manager to assist EMG in determining if recognized environmental conditions exist at the Project. A copy of the Key Site Manager Questionnaire is included in Appendix D.

KEY SITE MANAGER INTERVIEWS			
NAME	RELATIONSHIP TO PROPERTY	YEARS WITH PROPERTY	TELEPHONE NUMBER
Joey Mieduch	Property Manager	1	480.639.9945

The Key Site Manager did not identify any recognized environmental conditions or environmental concerns with the current or historical use of the Project.

5.8.2 CURRENT OCCUPANTS

EMG made a reasonable attempt to interview all major occupants and also those other occupants whose operations are likely to indicate a recognized environmental condition.

No occupants of the Project were available or would agree to an interview. Refer to Section 1.2 for further discussion of this data gap.

5.8.3 CURRENT OWNER

EMG submitted an Owner Questionnaire to the user in an effort to identify the owner of the Project who could be interviewed to provide information regarding proceedings involving the Project.

#	QUESTION ASKED OF OWNER	RESPONSE	COMMENTS
1	Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property?	No response	
2	Are you aware of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property?	No response	
3	Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?	No response	

A completed Owner Questionnaire was not returned to EMG. The lack of this information represents a data gap. However, based on the other information obtained during the completion of this assessment, the lack of the User Questionnaire does not represent a significant data gap.

5.8.4 PAST OWNERS AND OCCUPANTS

No past owners of the Project, who likely would have material information regarding recognized environmental conditions at the Project, were identified.

5.8.5 NEARBY OWNERS AND OCCUPANTS

The Project was not an abandoned property with evidence of unauthorized uses or uncontrolled access; therefore, interviews were not conducted with adjacent or nearby property owners or occupants.

6.0 HISTORICAL USE INFORMATION

The purpose of the historical review is to determine the previous uses of the Project and surrounding area in order to identify the likelihood of past uses having led to a recognized environmental condition. Historical sources that are both reasonably ascertainable, and likely to be useful are reviewed in an attempt to document the historical use of the Project and surrounding areas dating back to 1940, or the first developed use, whichever is earlier.

Copies of representative historical maps/aerial photographs are included in Appendix C. Other historical documentation, such as City Directory abstracts, copies of building department records, and ownership records are included in Appendix F, when available.

The following standard historical sources were researched:

EMG was not able to obtain standard historical sources that document the Project history in five year intervals. Furthermore, EMG was not able to document the use of the Project back to the first developed use, or back to 1940, whichever is earlier. The lack of this information represents a data gap. However, based on the other information obtained during the completion of this assessment, the lack of this information does not represent a significant data gap.

7.0 ENVIRONMENTAL RECORDS REVIEW

The purpose of the records review is to obtain and review records that will help identify recognized environmental conditions. ASTM E1527-13 requires the review of reasonably ascertainable records from standard sources as defined in Section 8.2.1 of ASTM E1527-13. Additional records sources, such as local fire department records, local building department records, and local environmental health department records may be obtained and reviewed at the discretion of the environmental professional.

The availability of record information varies widely, depending on the source. Reasonably ascertainable records are those records that are publicly available, obtainable within reasonable time and cost constraints, and practically reviewable. In addition, the records must be provided by the agency within 20 calendar days of receiving a request, at no more than a nominal cost intended to cover the source's cost of retrieving and duplicating the information.

7.1 REGULATORY DATABASE REVIEW

EMG obtained a regulatory database report from Environmental Data Resources, Inc. (EDR) in an effort to determine if the Project is a listed regulatory site and whether there are any mappable regulatory database sites within the search distances specified by ASTM E1527-13. EMG attempted to field-verify the locations of the EDR-identified regulatory sites, as well as confirm distances and locations relative to the Project using available mapping software. Therefore, the distances and/or directions noted in this section may not match the EDR Report. In addition, EMG reviewed the unmappable sites in the database report, cross-referencing addresses and site names.

In accordance with ASTM E1527-13, regulatory files and/or records associated with standard environmental record sources may be obtained and reviewed when the files and/or records are reasonably ascertainable, the files/records are expected to contain significant information for the purpose of identifying recognized environmental conditions, and an alternative source of the information is not available. Furthermore, review of regulatory files and/or records may be limited by the scope of work. Unless otherwise noted in Section 1.1, further review of regulatory agency files and/or records is not considered to be warranted based on the general nature of the regulatory database listing, the level of detail provided in the regulatory database, the availability of information from alternative sources, and/or the low likelihood that the agency files and/or records will contain information indicating the presence of a recognized environmental condition.

A copy of the full regulatory database report is included in Appendix H.

7.1.2 OFF-SITE REGULATORY DATABASE REVIEW

Regulatory database listings which have a reasonable potential to impact the Project are discussed below. This determination is based on, but not limited to, such factors such as the topographic gradient in relation to the Project, the estimated groundwater flow direction in the vicinity of the Project, the distance between the listed site and the Project, the type of site or materials involved, and/or whether a release to the environment is known or likely to have occurred.

Vapor Migration Concern:	No

7.1.3 VAPOR MIGRATION

Indoor air quality concerns are generally excluded from the scope of ASTM E1527-13 and this assessment. However, the migration of vapors caused by a release of hazardous substances or petroleum products to the environment can represent a recognized environmental condition in certain conditions.

For the purposes of this assessment, the potential for migrating vapors to represent a recognized environmental condition was evaluated using a limited screening method based on technical guidance documents from the US EPA and *ASTM E2600-10 Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*. In addition, screening tools created by regulatory agencies may be used to evaluate the significance of a release with respect to the vapor migration and/or vapor intrusion potential. EMG's vapor migration screening is not a human health risk assessment and is not intended to comply with regulatory requirements that might exist for the evaluation of vapor migration.

Based on the review of regulatory database records in Section 7.1.1 and 7.1.2, no vapor migration concerns were identified.

7.2 LOCAL AGENCY RECORDS

The following additional environmental records were reviewed to supplement the standard environmental record sources discussed in Sections 7.1.1 and 7.1.2.

Reasonably ascertainable records for the Project may be reviewed for evidence of recognized environmental conditions and other environmental concerns such as underground storage tanks, significant hazardous materials use, the presence of septic systems, and/or the presence of wells.

8.0 ASTM E1527 NON-SCOPE CONSIDERATIONS

The items discussed in this section are outside the scope of ASTM E1527-13. These are included at the discretion of the user based upon the scope of work.

8.1 ASBESTOS

In accordance with the scope of work, EMG performed a screening to document the presence of known and/or suspect asbestos containing materials (ACM) at the Project. This screening approach is not a comprehensive (i.e., AHERA-Style) asbestos survey, nor is it intended to fulfill the NESHAP requirements for demolition or renovation purposes. All materials listed in Appendix G of the United States Environmental Protection Agency (USEPA) publication Managing Asbestos in Place (the "Green Book") are considered suspect. Some non-friable building products, such as sheet vinyl floor tile, vinyl floor tile, floor tile mastic, asbestos-cement board, and roofing materials can still be manufactured with asbestos and installed in the United States. However, U.S. manufacturers have largely excluded asbestos fibers from their building products since 1981. In addition to a visual assessment, EMG reviewed provided documents, such as building plans and previous asbestos surveys to determine if asbestos has been previously documented at the Project.

SUSPECT ASBESTOS CONTAINING MATERIALS		
MATERIAL	FRIABLE	CONDITION
Roofing materials	No	Good
Vinyl composition tile	No	Good
Mastic	No	Good

FINDINGS

Based on the scope of work, sampling of suspect asbestos containing materials was not performed. Furthermore, since the Project was developed after 1981, it is unlikely that asbestos containing materials are present in quantities that would require further assessment at this time. No further action or investigation is recommended regarding asbestos containing materials.

8.2 RADON GAS

Radon originates from the natural (radioactive) breakdown of uranium in soil, rock and water and is the second leading cause of lung cancer in the United States. Radon can move up through the ground and into living spaces through cracks and other holes in the foundation. The USEPA has developed the EPA Map of Radon Zones to assist National, State, and local organizations in implementing radon-resistant building codes. This map assigns each county in the U.S. to one of three zones based on radon potential. The USEPA uses a continuous exposure level of 4.0 pCi/L (picoCuries per liter of air) as an action level at which additional action is recommended.

For the purposes of this assessment, the radon zone and the use of the Project have been used to determine the level of risk associated with radon. However, the USEPA and the Surgeon General recommend testing all homes for radon, regardless of geographic location.

EPA RADON ZONE
Zone 2 (Moderate Potential) - Counties have a predicted average indoor radon screening level between 2 and 4 pCi/L.

FINDINGS

Radon sampling was not performed based on the non-residential use of the Project and the Scope of Work.

8.3 LEAD BASED PAINT

All paint applied prior to 1978 is considered suspect. The basis for this determination is taken from the Lead Paint Poisoning Act passed by the Congress of the United States that banned the use of lead paint starting January 1, 1978. This screening approach does not

comply with Requirements for Disclosure of Known Lead-Based Paint and/or Lead-Based Paint Hazards in Housing. This approach does not constitute a pre-occupancy survey or the basis of attainment of "Lead Free" certification.

FINDINGS

Generally, due to the date of construction, the potential use of lead-based paint was minimized due to regulatory requirements and sound business practice. Based on the date of construction and the Scope of Work, no samples were collected. No further action or investigation is recommended regarding lead-based paint.

8.4 LEAD IN DRINKING WATER

Lead is commonly used in household plumbing materials and water service lines. Exposure to lead in drinking water above the USEPA action level can result in adverse health effects in children and adults. Lead is rarely found in source water, but enters tap water through corrosion of plumbing materials. Homes built before 1986 are more likely to have lead pipes, fixtures and solder. The most common problem is with brass or chrome-plated brass faucets and fixtures which can leach significant amounts of lead into the water. The USEPA action level for lead-in-drinking water is 15 parts per billion (ppb).

FINDINGS

According to information from the local water utility, the water supplied to the Project is within federal, state, and local drinking water quality standards. In addition, construction of the Project occurred after the 1986 ban on lead drinking water piping, lead solder, and flux on copper drinking water piping. No further action or investigation is recommended regarding lead in drinking water at the Project.

8.5 MOISTURE CONDITIONS

EMG performed a limited visual and olfactory assessment for evidence of moisture conditions in readily accessible interior areas of the Project. In addition, the Key Site Manager was interviewed regarding the presence of current and historical moisture conditions. This assessment was not designed to discover all areas which may be affected by moisture conditions. Rather, it is intended to provide an indication of significant moisture conditions observed during the site visit. Moisture conditions may be present in areas not observed, such as pipe chases, HVAC systems, and behind enclosed walls and ceilings. De minimis moisture conditions, such as small, isolated, water stains on ceiling tiles, and mildew at bathtubs and sinks are considered to be routine maintenance issues and are not addressed in this Report.

FINDINGS

EMG did not observe visual or olfactory indications of significant moisture conditions in readily accessible interior areas of the Project. Furthermore, the Key Site Manager did not report any significant current or historical moisture conditions at the Project.

8.6 WETLANDS

For regulatory purposes under the Clean Water Act, the term wetlands means "those areas that are inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions. Wetlands generally include swamps, marshes, bogs and similar areas." A wetlands delineation is beyond the scope of this assessment. However, review of National Wetlands Inventory (NWI) data, provided by the United States Fish and Wildlife Service, indicated the following:

WETLANDS REVIEW	
PROJECT	ADJACENT PROPERTIES
Review of the NWI data did not identify any wetlands.	Review of the NWI data did not identify any wetlands.

FINDINGS

No wetlands were identified. No further action or investigation is recommended regarding wetlands.

8.7 FLOOD ZONE

FEMA identifies flood hazards, assesses flood risks and partners with states and communities to provide accurate flood hazard and risk data to guide them to mitigation actions. Flood hazard mapping is the basis for the National Flood Insurance Program (NFIP) and flood insurance requirements. FEMA maintains and updates data through Flood Insurance Rate Maps (FIRMs) and risk assessments. FIRMs include statistical information such as data for river flow, storm tides, hydrologic/hydraulic analyses and rainfall and topographic surveys. Review of the FIRM indicated the following:

FLOOD ZONE MAP REVIEW	
MAP DATE	PROJECT FLOOD ZONE
October 16, 2013	The entire Project is located in Zone AO, defined as river or stream flood hazard areas, and areas with a one percent or greater chance of shallow flooding each year, usually in the form of sheet flow, with an average depth ranging from one to three feet. These areas have a 26% chance of flooding over the life of a 30-year mortgage. Average flood depths derived from detailed analyses are shown within these zones.

FINDINGS

The flood zone designation is provided for informational purposes only. A determination of the need for flood insurance is beyond the scope of this assessment.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there is 1 EDR US Hist Cleaners site within approximately 0.25 miles of the target property.

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. Version Date:	2014

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Project Experience

Portfolio of Hotels; Various, CA – As an environmental professional, Mr. Finch performed 12 Phase I Environmental Site Assessments of hotels throughout southern California. Mr. Finch's historical research of the use of these sites identified a historical gasoline filling station and the use of oil and gas wells. His work helped EMG complete this project ahead of schedule and within the budget.

Multi-Use Commercial Center; Chicago, IL – As an environmental professional, Mr. Finch performed a Phase I Environmental Assessment of a 21 parcel track of land in the urban Chicago area consisting of approximately 11 acres and nearly 200,000 square feet of retail space. Mr. Finch's historical research of the uses of the site identified several gasoline filling stations, automotive repair facilities, and a rail yard as historical uses of the site. His worked helped complete the accelerated turnaround time on schedule and within budget.

Portfolio of Heavy Agricultural Facilities; Various, MI – Mr. Finch served as an environmental professional for the completion of Phase I Environmental Site Assessments for a portfolio of six heavy agricultural facilities. Due to historical bulk storage of pesticides and fertilizers, soil and groundwater sampling was conducted by Mr. Finch. He completed Category S Baseline Environmental Assessments for these facilities after significant impact was identified in the soil and groundwater sampling. The client was able to obtain these facilities without inheriting the environmental liability.

Project Experience Cont.

Former Apple Orchard; Grand Rapids, MI – Mr. Finch served as an environmental professional for the completion of a Phase I Environmental Site Assessment for a several hundred acre former apple orchard which was to be redeveloped for residential use. A Phase II Investigation was recommended and implemented by Mr. Finch. The Phase II investigation identified elevated concentrations of arsenic as a result of historic pesticide use. Mr. Finch implemented remediation activities consisting of soil removal and developed a sampling strategy for verification of remediation. The client was able to show that individual lots were not impacted by arsenic and obtained full asking price.

RE: Verizon site name PHO Hacienda

Dear Mr. Todd Martin:

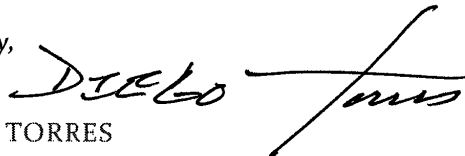

Per our conversation last week, please find enclosed an application for Non-Title V Air Quality Permit for the above referenced site. All necessary supporting documents are also attached.

To recap briefly:

- Due to the minimal horsepower size of the generators, a permit is not required.
- In order to obtain a letter stating thus, Verizon Wireless must submit an application with fee for due process.
- MCQAD will streamline a process for the Verizon Wireless applications after review of initial 2 application submittals.
- By virtue of this cover letter attachment, all Verizon Wireless application submittals will be considered *priority and expedited*.

If you have questions, please call me at 602-819-2949. I look forward to hearing from you soon.

Sincerely,

DIEGO TORRES

RE: Application for Non-Title V Air Quality Permit

Dear Ms. Petersen:

We have reviewed your application, identified as permit number 080116 on your receipt. Based on the information provided, we have determined that an Air Quality Permit is not required because proposed emissions and/or equipment are under the threshold levels requiring a permit as established by Rule 200 of the Maricopa County Air Pollution Control Rules and Regulations (Rules). The facility, as described in the permit application, was determined to be de minimis per Rule 200 §303.3.c.(5)(b).

Although a permit is not required at this time, you must comply with any applicable requirements of the Rules and must maintain records to demonstrate that the threshold levels requiring a permit are not exceeded. In addition, if the generator was manufactured after April 1, 2006, you must also comply with Code of Federal Regulations 40 CFR §60.4200 Subpart IIII - Standards of Performance for Stationary Compression Ignition Internal Combustion Engines.

Because the process at your facility was determined to be de minimis, if for any reason you wish the Department to proceed with this permit, you must contact the Department in writing within ten business days of the receipt of this letter.

In the future, if you exceed the threshold levels or wish to modify your processes or usage in a way that will exceed the threshold levels, a permit will be required. If you have any questions, please give me a call at (602) 506-6742.

Sincerely,

A handwritten signature in cursive script that reads "Michelle Hammond".

Arthur,

The only records that I could find pertaining(Acct# 22805) to your request were CESQG (Conditionally Exempt Small Quantity Generators) and ADEQ does not regulate these types of generators.

ADEQ Records Management Center now considers this request complete.

RE: RCRA EPA ID number: AZR000504316 is assigned to:

KIDDIE KANDIDS #00607
7000 E Mayo Blvd
Phoenix, AZ 85054-6151

Your facility is listed as a SQG. This EPA ID number is site-specific and is to be used for the regulated (RCRA) waste activity at the above site only. If there are any changes to the information regarding the above site submitted on the EPA RCRA Subtitle C Site Identification Form (Form 8700-12), you must notify Arizona by sending a new 8700-12. Each section of the 8700-12 must be filled out completely.

If your facility has a change of location, do not use the EPA ID number assigned to this location to manifest RCRA waste at the new location. Before generating RCRA waste at the new location, you must apply for an EPA ID by sending an 8700-12 for the new location. Your new location will be assigned an EPA ID number specific to that site.

In the future if your facility's RCRA waste activity at this site stops because of closure or change of location, then send a letter requesting deactivation of the of the EPA ID number assigned to this location. The deactivation letter should be on company letterhead. Include the following information regarding this location: the EPA ID number to be deactivated, name of facility, location or address of facility, the date that regulated waste activity stopped, and an original ink signature.

If you have any questions, or need assistance, please contact Annette Tripke at (602) 771-4232.

Pursuant to your request, the Arizona Department of Environmental Quality (ADEQ) has deactivated the RCRA EPA ID number AZR000504316 assigned to the following site:

Location: KIDDIE KANDIDS #00607
7000 E MAYO BLVD
PHOENIX, AZ 85054

Unless RCRA regulated activity resumes at the site, this RCRA EPA ID number will remain deactivated. In future, if you propose to resume any RCRA waste generation activity at this site, the RCRA EPA ID number needs to be reactivated in accordance with RCRA Subtitle C.

All RCRA EPA ID numbers are site-specific. If your facility moves to a new location, you must apply for a new RCRA EPA ID prior to generating RCRA waste at the new location. You cannot use the EPA ID number assigned to your previous location at the new site. A new EPA ID number will be assigned for the new site.

If you have any questions, or need assistance, please contact ADEQ at (602) 771-4173.

RE: RCRA EPA ID Number

The Arizona Department of Environmental Quality (ADEQ) has updated the information for your facility according to the Subsequent RCRA Subtitle C Site Identification Form (8700-12) or letter received in our office. The following EPA ID number was updated:

AZR000047704
HOME DEPOT 0409
7000 E Mayo Blvd
Phoenix, AZ 85054-6151

ADEQ has listed your facility as a SQG. The EPA ID number for your location is also referred to as a "RCRA ID" number and is to be used on transport manifests and any other hazardous waste management documents required under Subtitle C of RCRA.

This number is site specific and is to be used for the waste activity at this site only. If you have a change of location, do not use this number at the new site. Before conducting waste at the new site, notify ADEQ with an 8700-12 for the new location. You will be assigned a new EPA ID number for the new site.

If your facility's activity ceases because of closure or change of location, send a letter on company letterhead requesting deactivation of the old site with that number, name, address, and date waste activity stopped with an original signature.

RE: RCRA EPA ID Number Deactivation

This is a statement verifying that RCRA EPA ID number AZR000047704 has been deactivated as you requested. This RCRA ID number was assigned to the following site:

HOME DEPOT 0409
7000 E Mayo Blvd
Phoenix, AZ 85054-6151

Unless RCRA regulated activity resumes at the site, this RCRA EPA ID number will remain deactivated. If this site generates RCRA regulated waste in the future, the RCRA EPA ID number needs to be reactivated by sending a RCRA Subtitle C Site Identification Form (8700-12) for the site. To avoid confusion, make sure your RCRA EPA ID number appears on all notifications.

All RCRA EPA ID numbers are site-specific. If your operation has moved to a new location, you must complete a new Form 8700-12 for that location. All 8700-12 Forms and related correspondence regarding your RCRA EPA ID number must be directed to:

RE: RCRA EPA ID Number

The following EPA ID number: AZR000047704 has been assigned to:

Home Depot #409
7000 E Mayo Blvd
Phoenix, AZ 85054

This EPA ID number is site-specific and is to be used for the regulated (RCRA) waste activity at the above site only. If there are any changes to the information regarding the above site submitted on the EPA Notification of Regulated Waste Activity (Form 8700-12), you must notify Arizona by sending a new 8700-12. Each section of the 8700-12 must be filled out completely.

If your facility has a change of location, do not use the EPA ID number assigned to this location to manifest RCRA waste at the new location. Before generating RCRA waste at the new location, you must apply for an EPA ID by sending a 8700-12 for the new location. Your new location will be assigned an EPA ID number specific to that site.

In the future if your facility's RCRA waste activity at this site stops because of closure or change of location, then send a deactivation letter requesting deactivation of the EPA ID number assigned to this location. The letter should be on company letterhead. Include the following information regarding this location: The EPA ID number to be deactivated, name of facility, location or address of facility, the date that regulated waste activity stopped, and an original ink signature.

If you have any questions, or need assistance, please contact:

RE: RCRA EPA ID Number

The Arizona Department of Environmental Quality (ADEQ) has updated the information for your facility according to the Subsequent RCRA Subtitle C Site Identification Form (8700-12) or letter received in our office. The following EPA ID number was updated:

AZR 000 047 704
Home Depot USA Inc HD 0409
7000 E Mayo Blvd
Phoenix, AZ 85054

ADEQ has listed your facility as: Conditionally Exempt Small Quantity Generator (CESQG)

The EPA ID number for your location is also referred to as a "RCRA ID" number and is to be used on transport manifests and any other hazardous waste management documents required under Subtitle C of RCRA.

This number is site specific and is to be used for the waste activity at this site only. If you have a change of location, do not use this number at the new site. Before conducting waste at the new site, notify ADEQ with an 8700-12 for the new location. You will be assigned a new EPA ID number for the site.

If your facility's activity ceases because of closure or change of location, send a letter on company letterhead requesting deactivation of the old site with that number, name, address, and date waste activity stopped with an original signature.

Sincerely,

Wilma Molitor, P&PSII

These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The user should provide the following information to the <i>environmental professional</i>. Failure to conduct these inquiries could result in a determination that "<i>all appropriate inquiries</i>" is not complete.</p>		
Property Address:		
		YES NO
1.	Did a search of recorded land title records (or judicial records where appropriate, (see Note 1 below) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?	
	Note 1 – In certain jurisdictions, federal, tribal, state or local statutes, or regulations specify that environmental liens and Activity and Use Limitations (AULs) be filed in judicial records rather than in land title records. In such cases, judicial records must be searched for environmental liens and AULs.	
2.	Did a search of recorded land title records (or judicial records where appropriate, (see Note 1 above) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?	
3.	Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	
4.	Does the purchase price paid for this property reasonably reflect the fair market value of the property?	
	If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?	
5.	Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example:	
	a. Do you know the past uses of the property?	
	b. Do you know of specific chemicals that are present or once were present at the property?	
	c. Do you know of spills or other chemical releases that have taken place at the property?

	e. Do you know of any commercial or industrial use of hazardous substances or petroleum products that have taken place at the property or that may have affected the property?
